Satellite Dishes Regulations

If you want to install a satellite dish, you may need a permit from Council to do so.

You will need a permit if you want to install a satellite dish on a building or other structure listed in the Heritage Overlay or on land in a Residential 1 Zone, Residential 2 Zone, Residential 3 Zone, Low Density Residential Zone or Mixed Use Zone.

You DO NOT need a permit for a satellite dish with a diameter:

- less than 1.2m
- between 1.2m and 2.4m IF:
 - the dish can't be seen from the street (other than a lane) or a public park
 - the dish is set back from the side or rear boundary 1 metre, plus 0.3m for every metre of height over 3.6m up to 6.9m, plus 1 metre for every metre of height over 6.9m
 - the dish is set back at least 3m from the boundary where it is opposite an existing habitable room window.
