

7.7 Procurement Policy Annual Review 2020

Abstract

Section 186A of the *Local Government Act 1989* (the 1989 Act) requires all councils to review their Procurement Policy at least once in each financial year and, if necessary, revise the Policy.

Council's current Procurement Policy was adopted by Council in June 2019. A review of the Policy has been completed. The policy is believed to have provided sound guidance and a consistent framework for the conduct of Council's procurement activities.

The new *Local Government Act 2020* (the 2020 Act) contains provisions regarding procurement, noting at section 108(1) 'a Council must prepare and adopt a Procurement Policy which specifies the principles, processes and procedures applying in respect of the purchase of goods and services by the Council, including for the carrying out of works'. Section 108(3) lists various matters the Procurement Policy must include, and the 2020 Act refers to regulations which may prescribe various requirements. Under the 2020 Act, the Procurement Policy must be reviewed at least once during each 4-year Council term.

The procurement provisions of the 2020 Act commence from 1 July 2021 and Councils have until 1 January 2022 to adopt their first Procurement Policy under those provisions. Until then, the provisions of the 1989 Act continue to apply.

Officers expect the Procurement Policy will be significantly refreshed in aligning with the requirements of the 2020 Act. With the existing policy having served Council well, minor changes are proposed at the present time to Council's Procurement Policy. These updates include reference to the Sustainable Council Buildings Policy as it relates to procurement, clarity that procurement evaluation criteria will give regard to the principles in the Procurement Policy, and other minor administrative amendments to update the version number and effective date of operation. During the coming year officers will commence the preparation of the Procurement Policy required under the 2020 Act.

The Procurement Policy is now presented to Council for formal adoption.

Officers' recommendation

That Council resolve to:

1. Note the review of the Procurement Policy undertaken in accordance with the requirements of the *Local Government Act 1989*.
2. Adopt the Procurement Policy, as detailed in **Attachment 1**.

**Responsible director: Bruce Dobson
Customer Experience and Business
Transformation**

1. Purpose

For Council to note the outcomes of the annual review of the Procurement Policy and to adopt the revised Procurement Policy (**Attachment 1**) prepared to comply with requirements of the *Local Government Act 1989* (the Act).

2. Policy implications and relevance to community plan and council plan

This report is aligned with the Council Plan 2017-21, Theme 7: Civic Leadership and Governance and Strategic Objective 7 of the Boroondara Community Plan 2017-27, to "*Ensure that ethical, financial and socially responsible decision making reflects community needs and is based on principles of accountability, transparency, responsiveness and consultation*".

3. Background

Section 186A of the *Local Government Act 1989* requires:

1. *A Council must prepare and approve a procurement policy.*
2. *A Council must within 12 months after the commencement of section 67 of the Local Government Amendment (Councillor Conduct and Other Matters) Act 2008 prepare and approve a procurement policy.*
3. *A procurement policy must include any matters, practices or procedures which are prescribed for the purposes of this section.*
4. *A Council must have regard to guidelines made under subsection (5) in preparing a procurement policy.*
5. *The Minister may make guidelines with respect to the form or content of a procurement policy.*
6. *Guidelines made under subsection (5) must be published in the Government Gazette.*
7. *At least once in each financial year, a Council must review the current procurement policy and may, in accordance with this section, amend the procurement policy.*
8. *A copy of the current procurement policy must be available for inspection by the public-*
 - a. *at the Council office; and*
 - b. *on the Council's Internet website.*
9. *A Council must comply with its procurement policy.*

No prescribed guidelines or prescribed material has been issued by the Minister in respect of sub-sections 3, 4, 5 and 6 above.

4. Outline of key issues/options

As noted in subsection (7) above, the 1989 Act requires an annual review of the Procurement Policy.

Officers consider the current Procurement Policy adopted by Council in June 2019 has served Council well.

Council-wide information sessions conducted by the Procurement Team over the last 12 months covering Council staff responsibilities and accountabilities detailed in the Policy have raised visibility of the Procurement Policy generally.

Looking ahead, Sections 108 and 109 of the new *Local Government Act 2020* (the 2020 Act) will apply to Council's future Procurement Policy. These sections from the 2020 Act read as follows:

Section 108 Procurement Policy

- (1) *A Council must prepare and adopt a Procurement Policy which specifies the principles, processes and procedures applying in respect of the purchase of goods and services by the Council, including for the carrying out of works.*
- (2) *A Procurement Policy must seek to promote open and fair competition and provide value for money.*
- (3) *A Procurement Policy must include the following—*
 - (a) *the contract value above which the Council must invite a tender or seek an expression of interest;*
 - (b) *a description of the criteria to be used by the Council to evaluate whether a proposed contract provides value for money;*
 - (c) *a description of how the Council will seek collaboration with other Councils and public bodies in the procurement of goods or services;*
 - (d) *the conditions under which the Council may purchase goods or services without inviting a public tender or expression of interest;*
 - (e) *a description of the process to be undertaken in inviting a public tender or expression of interest;*
 - (f) *any other matters prescribed by the regulations.*
- (4) *The contract value to be included in a Procurement Policy in accordance with subsection (3)(a) must not exceed the value prescribed by the regulations for the purposes of this section.*
- (5) *A Council must review its Procurement Policy at least once during each 4 year term of the Council.*
- (6) *A Council must adopt the first Procurement Policy under this section within 6 months of the commencement of this section.*
- (7) *Until a Council adopts a Procurement Policy under this section—*
 - (a) *the procurement policy approved by the Council under section 186A of the **Local Government Act 1989** which is in effect before the commencement of this section applies as if the procurement policy had been adopted under this section; and*
 - (b) *the restrictions on the power of a Council to enter into a contract under sections 186 and 186A of the **Local Government Act 1989** as in force before the commencement of this section continue to apply as if those sections had not been repealed.*

Section 109 Procurement

- (1) *A Council must comply with its Procurement Policy before entering into a contract for the purchase of goods or services or the carrying out of works.*
- (2) *The Chief Executive Officer must ensure that any report to the Council that recommends entering into a procurement agreement includes information in relation to any opportunities for collaboration with other Councils or public bodies which may be available.*

The procurement provisions of the 2020 Act commence from 1 July 2021 and Councils have until 1 January 2022 to adopt their first Procurement Policy under those provisions. Until then, the provisions of the 1989 Act continue to apply.

Officers expect the Procurement Policy will be significantly refreshed in aligning with the requirements of the 2020 Act. With the existing policy having served Council well, minor changes are proposed at the present time to Council's Procurement Policy. These updates include reference to the Sustainable Council Buildings Policy as it relates to procurement (sections 1.3 and 15.2), clarity that procurement evaluation criteria will give regard to the principles in the Procurement Policy (section 4.1.2), and other minor administrative amendments to update the version number and effective date of operation. During the coming year officers will commence the preparation of the Procurement Policy required under the 2020 Act.

5. Consultation/communication

Following adoption by Council, the Policy will be widely communicated to Council staff and made available for public inspection as per sub-section (8) of the *Local Government Act 1989*.

6. Financial and resource implications

Implementation of the Policy is funded from the Commercial and Property Services Department budget.

7. Governance issues

Officers involved in the preparation of this report have no conflicts of interest.

The list of prescribed human rights contained in the Victorian Charter of Human Rights and Responsibilities has been reviewed in accordance with Council's Human Rights Compatibility Assessment Tool and it is considered that the proposed actions contained in this report present no breaches of, or infringements upon, those prescribed rights.

8. Social and environmental issues

Council is committed to reducing its environmental impacts and operating in a socially and environmentally sustainable manner. The Procurement Policy sets out a green procurement approach by supporting the principles of sustainable procurement and notes Council prefers to purchase environmentally preferred products whenever they achieve an equivalent function.

Assessment of Best Value includes consideration of the environmental impacts and credentials of goods, services and works.

The revised Policy maintains Council's commitment to the principles of social procurement, diversity and equal opportunity. The pre-tender planning process also allows for consideration of social procurement opportunities for each public tender run.

The Policy notes evaluation criteria (qualitative) for procurements are to be set with consideration to the principles set out in this Procurement Policy, including sustainability and social procurement.

9. Evaluation and review

As required under section 186A (7) of the Local Government Act 1989, the Policy is required to be reviewed at least once each financial year. This is included in the Commercial and Property Services Department annual Business Plan.

10. Conclusion

It is recommended Council adopt the revised Procurement Policy, as detailed in **Attachment 1**.

Acting Manager and Report officer: Rob Loats, Commercial and Property Services

Foreword

Council recognises the need to ensure its procurement practices achieve best practice principles including value for money, open and fair competition, accountability, risk management, probity and transparency.

It is important to note that Council's Procurement Policy is the foundation document in Council's procurement framework to guide day to day decision making to support the achievement of Council's objectives. This policy is further supported by a procedural framework and other relevant Council Policies (e.g. Conflict of Interest Policy, Gifts and Hospitality Policy, Contracts and Tendering Probity Policy, Purchasing Card Policy) to guide staff to effectively implement the principles in the Procurement Policy.

The Policy applies to all Council staff (including contractors and volunteers) and all other persons who are authorised by Council to undertake procurement on Council's behalf.

The City of Boroondara regularly reviews and updates its Procurement Policy and incorporates Boroondara City Council's requirements and objectives. It is revised annually in accordance with section 186A of the *Local Government Act 1989*.

NOTE: *This Procurement Policy replaces the earlier Procurement Policy adopted by Council on 11 June 2019.*

1 PRINCIPLES

1.1 Background

Boroondara City Council ("Council"):

- recognises that:
 - developing a procurement strategy and adopting appropriate best practice contracting and procurement principles, policies, processes and procedures for all goods, services and works by Council, will enhance achievement of Council objectives such as sustainable and social procurement; bottom-line cost savings; supporting local economies; achieving innovation; and better services for communities.
 - the elements of best practice applicable to local government procurement incorporate:
 - broad principles covering ethics, value for money, responsibilities and accountabilities;
 - guidelines giving effect to those principles;
 - a system of procurement authorisation limits (i.e. the authorisation of officers to approve and undertake a range of functions in the procurement process);
 - procurement processes, with appropriate procedures covering minor, simple procurement to high value, more complex procurement; and
 - a professional approach.
- Council's contracting, purchasing and contract management activities endeavour to:
 - support Council's corporate strategies, aims and objectives including, but not limited to those related to sustainability, protection of the environment, and corporate social responsibility;
 - achieve value for money and quality in the acquisition of goods, services and works by Council;
 - demonstrate that public money has been well spent;
 - be conducted, and be seen to be conducted, in an impartial, fair and ethical manner;
 - seek continual improvement including the embrace of innovative and technological initiatives such as electronic procurement processes to reduce activity cost; and
 - support business in the local community.

1.2 Purpose

The purpose of this Policy is to:

- provide policy and guidance to Council to allow consistency and control over procurement activities;
- demonstrate accountability to rate payers;
- provide guidance on ethical behaviour in public sector purchasing;
- demonstrate the application of elements of best practice in purchasing; and
- increase the probability of obtaining the right outcome when purchasing goods and services or undertaking works.

1.3 Scope

This Procurement Policy is made under section 186A of the *Local Government Act 1989*. This section of the *Local Government Act 1989* requires Council to prepare, approve and comply with a Procurement Policy encompassing the principles, processes and procedures applied to all purchases of goods, services and works by Council.

This Policy is an overarching policy that applies to all procurement activities conducted or overseen by Council and is binding upon Councillors, Council officers and temporary employees and consultants engaged by Council.

Under this Policy fall a number of other subordinate Council policies and guidelines that provide further specific detail relevant to their area. In particular, the following hierarchy should be noted where the:

- Contracts and Tendering Probity Policy provides guidance in respect of procurements that are considered high risk or which must be publicly tendered in accordance with section 186 (1) of the *Local Government Act 1989*¹;
- Purchasing Guidelines provide guidance and general procedures for the raising of purchase orders; and
- Purchasing Card Policy provides guidance on the issue and use of purchasing cards by Council staff.

¹ Section 186(1) of the *Local Government Act 1989* requires public tenders where the value of the goods, services or works is equal to or greater than the designated threshold values. The current threshold values are \$150,000 for the purchase of goods/services and \$200,000 for the purchase of works. These amounts were fixed in an Order in Council dated 5 August 2008 in alignment with State Government threshold levels.

For buildings specifically, Council's Sustainable Council Buildings Policy sets out clear commitments for achieving improved sustainability standards in the way Council's buildings are planned, designed, built, used and maintained. This Policy includes requirements regarding managing demand for new building spaces, facilitating optimal and sustainable use of our existing buildings, ensuring design and construction of sustainable buildings including planning for climate change and landscaping appropriately for the intended use and local context, and supporting common-sense 'like for better' sustainability opportunities through building maintenance and upkeep. For procurement of building works, a 5 star green star design and as-built rating has been established as the default minimum requirement for building works greater than \$1 million.

In addition to the above documents, a procedural Contract Management Manual is also available to assist Council staff in the administration and management of contracts and to ensure a consistent approach across Council to these activities.

Copies of these documents are available on Council's Intranet.

1.4 Treatment of GST

All monetary values stated in this Policy include GST except where specifically stated otherwise.

1.5 Definitions and abbreviations

Term	Definition
Act	<i>Local Government Act 1989</i>
Best Value (refer also section 3.4)	Best Value or value for money in procurement is about selecting the supply of goods, services and works taking into account both cost and non-cost factors. Lowest price is not the sole determinant of Best Value.
Commercial in Confidence	Information that, if released, may prejudice the business dealings of a party e.g., prices, discounts, rebates, profits, methodologies and process information.

Term	Definition
Contract management	The process that ensures both parties to a contract fully meet their respective obligations as efficiently and effectively as possible, in order to deliver the business and operational objectives required from the contract and in particular, to provide value for money.
Council staff	Includes full-time and part-time Council officers, and temporary employees, contractors and consultants while engaged by Council.
Objective	Council's Electronic Document and Records Management System.
ELT	Council's Executive Leadership Team
External consultant/contractor	An expert from outside Council who has been engaged to provide advice or assistance on a particular procurement and may include consultants/contractors with technical or other specialist expertise/knowledge, including probity practitioners.
Finance One	Council's corporate Finance system.
Probity	The dictionary definition of probity refers to uprightness, honesty, and integrity. Within government, the word "probity" is often used in a general sense to mean "good process" or "good governance". A procurement process that conforms to the expected standards of probity is one in which clear procedures that are consistent with Council's policies and legislation are established, understood and followed from the outset. These procedures are required to ensure ethical and responsible conduct and to maintain transparency. They also need to consider the legitimate interests of suppliers and ensure that all potential suppliers are treated fairly and equitably.
Sustainability	Activities that meet the needs of the present without compromising the ability of future generations to meet their needs.
Tender or quotation process	The generic process of inviting parties to submit a proposal, followed by the evaluation of submissions and selection of a successful respondent. Council's invitation to parties may include a simple quotation request or a more formal request for expressions of interest or tenders.

2 ETHICS AND PROBITY

2.1 Requirement

Council's procurement activities shall be performed with integrity and in a manner able to withstand the closest possible scrutiny.

2.2 Conduct of Councillors and Council staff

2.2.1 General

Councillors and Council staff shall at all times conduct themselves in accordance with the Councillors Code of Conduct and the Code of Conduct for Staff, and in ways that are, and are seen to be, ethical and of the highest integrity and will:

- ensure fair, equitable, and unbiased treatment of all parties including potential and existing suppliers;
- use consistent and transparent processes;
- not seek or receive personal gain;
- maintain confidentiality of Commercial in Confidence information
- present the highest standards of professionalism and probity;
- deal with suppliers in an honest and impartial manner that does not allow conflicts of interest;
- provide all suppliers with the same information and equal opportunity;
- be able to account for all decisions and provide feedback on them so that all decisions are understood and can be subsequently justified;
- ensure their actions embody the principles of sound financial and risk management; and
- comply with all legal and policy requirements.

2.2.2 Members of professional bodies

Councillors and Council staff belonging to professional organisations shall, in addition to the obligations detailed in this Policy, ensure that they adhere to any code of ethics or professional standards required by that body.

2.2.3 Reporting possible fraud and complaints

Council is committed to the aims and objectives of the *Protected Disclosure Act 2012* and does not tolerate improper conduct by employees, officers or contractors; or the taking of reprisals against those who come forward to disclose such conduct. Disclosures under the *Protected Disclosure Act 2012* that reveal corrupt conduct, conduct involving a substantial mismanagement of public resources, or conduct involving a substantial risk to public health and safety or the environment can be made to Council's Protected Disclosure Coordinator, the Chief Executive Officer, or directly to the Independent Broad-based Anti-corruption Commission (IBAC).

Other complaints or allegations of misconduct that do not fall within the *Protected Disclosure Act 2012* can be reported to STOPline, an independent organisation contracted by Council to receive such complaints, or be directed to Council's Protected Disclosure Coordinator or the Chief Executive Officer.

Any general complaints or concerns about the procurement process and procedures should be directed to the Manager Commercial and Property Services.

Refer contact details in section 19.1.

2.3 Procurement processes

All procurement processes shall be conducted in accordance with the requirements of this Policy and any associated policies, procedures, relevant legislation, relevant Australian Standards and the Act.

2.4 Probity practitioners

There may be circumstances where the use of an external probity practitioner would be appropriate. The decision as to the need for an external probity practitioner would normally be the responsibility of the relevant Department Manager in consultation with the Manager Commercial and Property Services and be based on factors including:

- complexity of the procurement project;
- where the risk associated with the procurement process is considered very high;
- where the procurement project has the potential for risk to Council's reputation; or
- the specialist nature of any potential issues.

Where a decision is made to appoint an external probity practitioner it is recommended that the appointment be made as early as possible in the procurement process and a probity plan should be prepared and in place before the procurement is commenced.

2.5 Conflict of interest

Councillors, Council staff and any external consultants/contractors engaged by Council shall at all time act in compliance with the conflict of interest requirements in the Act and the guidelines available from Local Government Victoria.

In particular, Councillors, Council staff and any external consultants/contractors shall:

- avoid situations in which private interests conflict, or might reasonably be thought to conflict, or have the potential to conflict, with their Council duties;
- not participate in any action or matter associated with the arrangement of a contract (i.e., evaluation, negotiation, recommendation, or approval), where that person or any member of their immediate family has a significant interest, or holds a position of influence or power in a business tendering or quoting for Council work; and
- note that the onus is on the individual involved being alert to and promptly declaring an actual or potential conflict of interest to Council.

Any actual or potential conflict of interest identified by Council staff and any external consultants/contractors as part of any procurement process must be declared to the Manager Commercial and Property Services on the Conflict of Interest Declaration form.

Councillors must disclose conflicts of interest at assemblies of Councillors and the records of assemblies must be reported to a Council meeting.

2.6 Openness and fairness

Prospective contractors and suppliers must be afforded an equal opportunity to tender or quote.

Impartiality must be maintained throughout the procurement process so it can withstand public scrutiny.

The commercial interests of existing and potential suppliers must be protected. Confidentiality of information provided by existing and prospective suppliers must be maintained at all times, particularly commercially sensitive material such as, but not limited to prices, discounts, rebates, profit, manufacturing and product information.

2.7 Accountability and transparency

Accountability in procurement means being able to explain and provide evidence on the process followed. The test of accountability is that an independent third party must be able to see clearly that a process has been followed and that the process is fair and reasonable.

Therefore the processes by which all procurement activities are conducted will be in accordance with Council's procurement policies and procedures as set out in this Policy and related, relevant Council policies and procedures and all procurement activities are to provide for an audit trail for monitoring and reporting purposes.

2.8 Gifts and hospitality

Councillors and Council staff must at all time act in accordance with relevant Acts, policies, guidelines and laws regarding gifts and hospitality.

One of the underlining principles of both Council's Councillors Acceptance of Gifts and Hospitality Guidelines and Council's Staff - Gifts and Benefits Policy is that no Councillor or member of Council staff shall seek or accept a gift, hospitality or other benefit if it is likely to be perceived by a 'reasonable person', as intended to, or likely to, influence him or her in the fair, impartial and efficient discharge of their duties, by such an action now and in the future.

2.9 Disclosure of information

Commercial in Confidence information received by Council must not be disclosed and is to be stored in a secure manner.

Councillors, Council staff and consultants/contractors engaged by Council are to protect information disclosed by organisations by refusing to release or discuss the following:

- any information that is Commercial in Confidence information; and
- pre-contract information including but not limited to information provided in tenders and quotations or subsequently provided in pre-contract negotiations.

Councillors, Council staff and consultants/contractors are to avoid references to current or proposed contracts in discussion with acquaintances or outside interests.

Discussion with potential suppliers during tender or quotation evaluations should not go beyond the extent necessary to resolve doubt on what is being offered by that supplier.

At no stage, other than authorised pre-contract negotiations, should any discussion be entered into which could have potential contractual implications prior to the contract approval process being finalised other than authorised pre-contract negotiations.

3 GOVERNANCE

3.1 Structure

Council shall:

- establish a procurement management responsibility structure and a system of procurement authorisation limits ensuring accountability, traceability and auditability of all procurement decisions made over the lifecycle of all goods, services and works purchased by Council;
- ensure that Council's procurement structure:
 - is flexible enough to purchase in a timely manner the diverse range of material, goods, works and services required by Council;
 - affords prospective contractors and suppliers an equal opportunity to tender or quote; and
 - encourages competition.

3.2 Standards

Council's procurement activities shall be carried out to the professional standards required by best practice and, where relevant, in compliance with:

- the Act;
- Council's policies such as but not limited to this Procurement Policy, the Contracts and Tendering Probity Policy and Purchasing Card Policy;
- Council's procedures such as but not limited to the Purchasing Guidelines and Contract Management Manual;

- Council's codes of behaviour such as but not limited to the Code of Conduct, Code of Ethics and Gifts and Hospitality policies;
- Victorian Local Government Best Practice Procurement Guidelines; and
- other legislative requirements such as but not limited to the Competition and Consumer Act, Goods Act, Charter of Human Rights and Responsibilities Act, and the Environmental Protection Act.

3.3 Integration with Council's Vision, strategies and policies

Council's procurement strategy shall support its corporate Vision, strategies and policies, including but not limited to those related to sustainability, protection of the environment, corporate social responsibility and meeting the needs of the local community.

In particular, Council's Vision is one of "A vibrant and inclusive city, meeting the needs and aspirations of its community" which it aims to achieve through its core values of:

- think customer experience;
- act with integrity;
- work together as one;
- own it, follow through;
- explore better ways and
- treat people with respect.

Council will live these values by displaying strong leadership as it supports the community focus on enterprise and wellbeing.

3.4 Best Value

3.4.1 Requirement

Council's procurement activities will be carried out on the basis of obtaining value for money consistent with acceptable quality, reliability and delivery considerations.

Lowest price is not the sole determinant of Best Value. Best Value in Council procurement is about selecting the supply of goods, services and works taking into account both cost and non-cost factors including:

- contribution to the advancement of Council's priorities and objectives;
- non-cost factors such as fitness for purpose, quality, social and environmental impacts, service and support; and

- cost-related factors including whole-of-life costs and transaction costs associated with acquiring, using, holding, maintaining and disposing of the goods, services or works.

3.4.2 Approach

The Best Value approach will be facilitated by:

- developing, implementing and managing procurement strategies that support the co-ordination and streamlining of activities throughout the lifecycle;
- effective use of competition;
- using aggregated contracts where appropriate;
- identifying and rectifying inefficiencies in procurement processes;
- developing cost efficient procurement processes including use of e-solutions, where appropriate;
- developing sustainable procurement processes that prioritise environmentally preferred products and services whenever they achieve the equivalent function;
- Council staff responsible for providing procurement services or assistance within Council providing competent advice in terms of available products and agreements; and
- working with suppliers to create relationships that are professional and productive, and are appropriate to the value and importance of the goods, services and works being acquired.

3.4.3 Role of specifications

Specifications used in tenders and quotations and to be incorporated into contracts are to support and contribute to Council's Best Value objectives through being written in a manner that:

- clearly describes what Council wishes to procure;
- ensures impartiality and objectivity;
- encourages the use of standard products;
- encourages sustainability; and
- eliminates unnecessarily stringent requirements

3.4.4 Contract management

The purpose of contract management is to ensure that Council, and where applicable its clients, receive the goods, services or works provided to the required standards of quality and quantity as intended by the contract by:

- establishing a system monitoring and achieving the responsibilities and obligations of both parties' under the contract;

- providing a means for the early recognition of issues and performance problems and the identification of solutions; and
- adhering to Council's adopted Risk Management Strategy and adhering to relevant Occupational Health and Safety Contractor Compliance Procedures.

Contracts are to be proactively managed in accordance with the contract requirements by the member of Council staff responsible for the delivery of the contracted goods, services or works to ensure Council receives Best Value.

Council's Contract Management Manual is available on Council's Intranet. The manual provides guidance and assistance to Council staff in the administration and management of contracts and aims to ensure a consistent approach across Council to these activities.

3.5 Methods

Depending on the value of the purchase and the risk associated with the procurement, Council's standard methods for purchasing goods, services and works are as follows;

- purchasing card;
- purchase order following a tender or quotation process from suppliers for goods or services that represent Best Value under directed procurement thresholds;
- in accordance with a formal contract entered into following a tender or quotation process;
- using aggregated purchasing arrangements with other councils, Victorian State Government (e.g. State Purchase Contracts, Whole-of-Government contracts), Procurement Australia, MAV Procurement, or other bodies; or
- other arrangements authorised by Council or the Chief Executive Officer (CEO) on an as needs basis, such as emergencies.

Council may, at its discretion and based on the complexity and cost of the project, conduct a one stage or multi-stage procurement process.

For example, a multi-stage procurement process would typically commence with an Expression of Interest (EOI) followed by a Request for Tender process involving the organisations short listed as a consequence of the EOI.

Expressions of Interest (EOI) may be appropriate where:

- Council wishes to consider ahead of formal tender processes such issues as whether those suppliers likely to tender possess the necessary technical, managerial and financial resources to successfully complete the project; the requirement is complex, difficult to define, unknown or unclear;
- the requirement is capable of several technical solutions;
- tendering costs are likely to be high and Council seeks to ensure that companies incapable of supplying the requirement don't incur unnecessary expense;

- it is necessary to pre-qualify suppliers and goods to meet defined standards; or
- the requirement is generally known but there is still considerable analysis, evaluation and clarification required (both of the objective and the solution).

3.6 Management of Public Tender Submissions

Council will, when a public tender is conducted:

- Provide a secure facility to receive electronic submissions for tenders;
- Allocate responsibility for managing the facility to a business unit in the organisation;
- Implement a process to inform suppliers of successfully receiving their submission;
- Apply procedures in relation to late submissions that accord with the following protocols:
 - Late submissions are not to be accepted unless the supplier can clearly document to the satisfaction of the Manager, Commercial and Property Services a technical issue with the software Council mandates to be used to lodge submissions has caused the submission to be late; and
 - The Manager, Commercial and Property Services must also be satisfied that accepting a late submission would not compromise the integrity of the market approach.
 - The Manager Commercial and Property Services may also seek advice from an external probity advisor as required.

3.7 Responsible financial management

The principle of responsible financial management shall be applied to all procurement activities.

Accordingly, to give effect to this principle, the availability of existing funds within an approved budget, or source of funds, shall be established prior to the commencement of any procurement action for the supply of goods, services or works.

Council funds must be used efficiently and effectively to procure goods, services and works and every attempt must be made to contain the costs of the procurement process without compromising any of the procurement principles set out in this Policy.

Council seeks to improve its performance by capturing and analysing procurement financial information with an aim to:

- reduce transaction costs;
- make processes more efficient;
- improve management information and visibility of spend;
- increase control and consistency of processes; and
- improve spend compliance.

3.8 Council staff responsibilities

Council staff must be aware of their role in ensuring that the principle of responsible financial management is maintained in their own procurement activities. For example,

- Council staff must not authorise the expenditure of funds in excess of their procurement authority limit;
- Council staff must not authorise or write multiple purchase orders to avoid the authorisation process requirements or their procurement authority;
- Council staff must not approve expenditure that relates to them personally and expenditure of this nature must be referred to the next higher level of authority for approval;
- Council staff must ensure that any purchase orders are generated at the point where the commitment to purchase goods, services or works has been made i.e. a purchase order must be raised in Finance One when the goods, services or works are ordered and not when the invoice is received; and
- expenditure must be recorded in a timely manner i.e. once the services or works have been completed, or the goods have been received, the appropriate Council officer must ensure that the correct amount is delivered against the relevant purchase order in Finance One.

4 PROCUREMENT PROCESSES AND THRESHOLDS

4.1 Process

Council's procurement processes shall be based on a number of principles as follows:

4.1.1 Strategic Procurement

Council's procurement processes will be based on the principles of Strategic Procurement. Planning for an individual procurement exercise will include consideration of aggregation opportunities, access to suppliers under existing contracts and analysis of alternative contract models. Guidance, and procurement planning templates, are available from the Commercial and Property Services Department.

4.1.2 Achieving Best Value

The benefits of the procurement are weighed against the costs necessary for the optimum result for Council and the local community. While Council is not required to accept the lowest price, it is required to take into account issues of quality, cost, accessibility of the service and other factors relevant to both the overall objectives and the Act.

Best Value may not mean the lowest price. In terms of the contracting process, Best Value requires Council to apply appropriate weighting for quality and price with as much transparency as is reasonably achievable. In this context price should take into account the whole life cost of the provision as far as is practicable.

In particular, unless otherwise approved by the relevant Director, all public tenders and formal Requests for Quotation shall be conducted on the basis that 'Price' (Quantitative) is weighted at a minimum of 40% as part of the evaluation criteria.

Other evaluation criteria (qualitative) shall be set with consideration to the principles set out in this Procurement Policy, including sustainability (section 15) and social procurement (section 14).

Achieving Best Value also requires challenging the need for the procurement and the way in which the service may be reconfigured to achieve improvements in service delivery, comparing service provision options against all those available, consulting with key stakeholders and ensuring competition in the open market.

Achieving Best Value shall be the basis of all procurement decisions within Council.

4.1.3 Probity

All Council procurement processes shall be conducted in a fair, honest, open manner with the highest levels of integrity and in the public interest. All suppliers are to be treated fairly in an open and transparent manner (refer also section 2.6).

4.1.4 Accountability and transparency

All Council procurement decisions must be justifiable and demonstrate that a fair, reasonable and transparent process has been followed (refer also section 2.7).

4.1.5 Risk management

Council shall have in place consistent strategies for managing risks associated with all procurement processes.

4.2 Procurement thresholds

Guidelines will be determined from time to time for minimum spend thresholds associated with Council's procurement activities. These will be decided by analysing the historical size and complexity of the procurement activity and of proposed procurement activities.

4.2.1 Publicly advertised procurements

The procurement of all goods, services or works with an estimated value equal to or greater than the designated thresholds contained in the Act² must be undertaken in a manner to ensure compliance with the Act. These thresholds may be varied by the Minister at any time. The thresholds must represent the estimated value of the whole of term of the contract i.e. the initial term plus any options to extend the initial contract term, and are to be inclusive of GST.

The options for a procurement process compliant with the public tendering requirements contained in the Act include:

² Section 186(1) of the *Local Government Act 1989*. Current thresholds are \$150,000 for the purchase of goods/services and \$200,000 for the purchase of works. These amounts were fixed in an Order in Council dated 5 August 2008 in alignment with State Government threshold levels.

- Council running its own publicly advertised tender process;
- Council participating in collaborative tender processes for similar services in conjunction with other councils, including councils in local procurement networks;
- Council appointing an external agent to run a tender process on its behalf. Organisations such as Procurement Australia and MAV (Municipal Association of Victoria) Procurement are active in this area;
- Council accessing Victorian State Government contracts (e.g. State Purchase Contracts, Whole-of-Government contracts) that have been made available to Local Government and which Local Government can access without the need to comply with the requirements of Section 186 (1) of the Act; or
- Council accessing contracts for panels of suppliers where those panels have been put in place through a compliant tender process. For example, these panel contracts may have been put in place through a Council run tender process, a tender process run for Council by an external agent or be a Victorian State Government panel made available to Local Government.

However, should the nature of the requirement and the characteristics of the market be such that it is considered a public tender process would lead to a better result for Council, public tenders may also be called for purchase of goods, services and works for which the estimated expenditure is below these thresholds.

4.2.2 Other procurements

The procurement of goods, services or works with an estimated value less than the designated thresholds contained in the Act ² may be undertaken using the following procurement methods. As above, these thresholds must represent the estimated value of the whole of term of the contract i.e. the initial term plus any options to extend the initial contract term, and are to be inclusive of GST.

When the required number of quotes for any of the purchase values below is sought but not obtained, this information must be documented as part of the evaluation approval process. If it is considered the quote/s obtained represent Best Value, the procurement may proceed with approval by the relevant staff member with the commensurate procurement authority limit.

- Goods, services or works with a value up to \$3,000.

Generally, low risk and low value purchases up to \$3,000 can be procured without the need for a prior written quotation.

If a written quotation(s) is obtained the details should be recorded in Objective before placing an order.

- Goods, services or works with a value between \$3,001 and \$10,000.

Generally, procurements in this value range should be subject to a competitive process to ensure that Council can demonstrate it has achieved Best Value. Other than as noted in section 4.2.3, at least two written quotations should be sought before placing an order with the quotation details recorded in Objective.

Officers should use best endeavours to ensure that the likely value of the works is known and agreed with the contractor before any commitment to proceed and written estimates or fee proposals obtained for these one-off, minor, low risk assignments are to be recorded in Objective. In addition, the reasons behind the procurement approach adopted are to be documented, approved by the relevant staff member with the commensurate procurement authority limit and recorded in Objective and as part of the Purchase Order details in Finance One.

- Goods, services or works with a value between \$10,001 and \$50,000.

Other than as noted in section 4.2.3, Council will seek a minimum of three written quotations by issuing a written Request for Quotation.

Details of all suppliers contacted and their quotations must be recorded (for example, on a spreadsheet or similar document) and be maintained in Objective.

- Goods or services with a value between \$50,001 and \$149,999 or Works with a value between \$50,001 and \$199,999.

Other than as noted in section 4.2.3, Council will seek a minimum of three and preferably up to five written quotations by issuing a written Request for Quotation.

Public advertising is not required. However, where the estimated value of the goods, services or works approaches the thresholds contained in the Act and it is reasonably foreseeable that the total value of the contract may increase due to, for example, variations, Council staff should consider running a publicly advertised process in the first instance.

Quotations returned by the nominated closing date and time must be evaluated by an evaluation panel of no less than two people and a written evaluation report must be completed. The written evaluation and recommendation must include details of all suppliers contacted and their quotations and must only be approved and signed off by an appropriate Council officer in accordance with their respective procurement authority limit. Guidance on the preparation of a written evaluation report can be obtained from Council's Procurement team, Commercial and Property Services Department.

The evaluation and recommendation document including the original suppliers' quotations and the evidence of formal approval and sign-off must be maintained in Objective.

- Public advertising.

In addition to the above methods, quotations may be advertised at the Council staff member's discretion. This may occur when potential respondents have not been established, an innovative approach is required, the estimated value of the contract is approaching the thresholds contained in the Act or the project has broad appeal that may attract keen prices.

- Quotations Module in Finance One

Council's Finance system includes a module, called Quotations, which links in with current processes and provides staff with an easy to follow process for seeking quotes that ensures compliance with the procurement requirements detailed in this section 4.2.2.

The Quotations module also provides a centralised system to document and record quotes sought and received and easy access to historical information and quotes in Finance One via Objective. The successful quote is automatically converted to a requisition in Finance One with minimal extra input required.

- Review of Procurement Activities

Further to section 3.7, Council's Commercial and Property Services Department undertakes regular checks of procurement activities across the organisation to review compliance with this section 4.2.2 and provide improved management information and visibility of spend, and increased control and consistency of procurement processes. Further, procurement activities are at all times subject to review through Council's audit processes (both internal and external) and fraud control processes (Council's Fraud and Corruption Control Policy).

4.2.3 Pre- approval process - insufficient suppliers identified or urgent works.

Circumstances may exist where, in advance of a procurement with an estimated value less than the designated thresholds contained in the Act, Officers consider the required number of quotations stipulated in section 4.2.2 above cannot be practically obtained. These circumstances may arise where, for example:

- existing technology and systems restrict the ability of other market participants to provide quotations, for example for software licensing or maintenance costs specific to one provider
- analysis and pre-planning has identified only a limited number of market participants able to meet Council's needs
- urgent works are required to be undertaken or urgent technical advice sought
- a contractor has undertaken previous related works and holds materials, specific knowledge or specialist equipment relating to the required works

Any decision to initiate a procurement acknowledging Council will not be able to obtain the number of quotations in section 4.2.2 must be approved in advance as follows and recorded in Objective, giving regard to the need for the procurement to represent Best Value:

- Procurements < \$50,000 - pre-approval by the relevant staff member with the commensurate procurement authority limit
- Procurement > \$50,000 - pre-approval by the relevant Director.

The pre-approval only covers the market engagement phase of the procurement and does not negate the need to complete a proper evaluation followed by the appropriate financial approval prior to engaging the supplier.

4.2.4 Use of Supplier Panels

As documented in the Victorian Local Government Best Practice Procurement Guidelines, the appointment of a panel of suppliers can be used to promote security of supply. As set out in section 4.2.1, panels can be put in place through a number of different processes including Council running its own tender process, a tender process run for Council by an external agent or Council having access to a Victorian State Government panel.

The use of supplier panels should be transparent as suppliers appointed to the panel will have a reasonable expectation that Council will provide panel members with an equal opportunity to quote for goods, services or works.

Where practicable, when accessing supplier panel arrangements quotations should be sought consistent with the guidelines set out in section 4.2.2 to ensure that any procurement through panels demonstrates value for money and a competitive process. In addition, if procurement exceeds the thresholds contained in the Act (refer section 4.2.1) then, as a minimum, the quotations should be sought consistent with the guidelines set out in section 4.2.2 for goods or services with a value between \$50,001 and \$149,999 or works with a value between \$50,001 and \$199,999. Some external panels such as the Victorian State Government Construction Suppliers Register also have specific conditions of use that dictate, among other things, the numbers of quotes that must be sought from contractor's pre-qualified on the Register. Such requirements must be complied with at all times.

Council officers responsible for the contract management of panel arrangements should be cognisant of day-to-day practicalities and acknowledge that a competitive public process and a value for money assessment has already been undertaken to establish the panel in the first instance. Accordingly, there may be situations where no further benefit is obtained from seeking quotations from the panel. For example,

- small, every-day, low risk, low value works such as those from trade services providers like electricians, plumbers; or
- where the contract with each individual panel supplier includes a comprehensive schedule of rates covering all expected work item types so the costs for packages of work can be accurately determined beforehand by the Council officer without the need for further quotations.

In the above examples, it may be appropriate for the Council officer to allocate work across the individual panel suppliers on the basis of their respective skill sets and capacity at the time to meet Council's required timeframes.

Where the Council officer believes that no further benefit or value will be achieved through seeking quotations from panel members, the approach to be adopted must be approved beforehand by the staff member with the commensurate procurement authority limit. A written record of the approach and the approval must be maintained in Objective.

5 LEASED ASSETS

Council will at all times maintain a register of current leased assets. This register will be the responsibility of the Manager Commercial and Property Services and will be forwarded to Governance Department on a monthly basis.

As new asset leasing arrangements are entered into the relevant Department Manager is required to provide a list of the new assets to the Manager Commercial and Property Services including salient details of the assets and the associated lease. Further, the Department Manager must also ensure that a copy of the associated lease agreement is filed in Objective to ensure that an accurate up-to-date central record of lease agreements is available at all times.

Execution of lease agreements is subject to Council's procurement authority requirements (refer section 6). However, the approval process for lease agreements also requires that they be signed off by the Manager Commercial and Property Services prior to execution.

6 PROCUREMENT AUTHORITY

6.1 Requirement

Procurement authority refers to the limitations within which a Council officer is permitted to procure goods, services or works on behalf of Council.

The preparation, acceptance (and execution of associated documentation) of tenders, quotations, contracts, purchase orders or purchasing card transactions resulting in the expenditure of funds for the purchase of goods, services or works must only be authorised in accordance with the respective Council officer's procurement authority limit. Any agreed variations to an established contract that result in additional expenditure of funds must also only be authorised in accordance with the officer's procurement authority limit.

A Council officer should only authorise the procurement of goods, services or works where the value of the procurement is within their procurement authority limit and the officer is comfortable and familiar with the type of procurement being managed. If the procurement involves Council taking on a risk or accepting a liability that goes beyond those expressed in Council's standard contract terms and conditions, then the matter should be referred to the appropriate Manager or Director for approval and/or execution. A Council officer must not hesitate in referring the matter to their Manager or Director if the officer has any doubts or concerns about the terms of the procurement.

Council shall maintain a documented scheme of procurement authority limits identifying those Council staff authorised to make procurement commitments in respect of goods, services or works on behalf of Council and their respective expenditure commitment limits.

6.2 Procurement authority limits

Procurement authority limits are defined by reference to Council's Instrument of Delegation to the CEO, the CEO's instruments of sub delegation to members of Council staff, or to Procurement Authority Statements.

Procurement authority limits enable Council to conduct procurement activities in an efficient and timely manner whilst maintaining transparency, integrity and accountability. Procurement authority limits also provide confidence to Council and the public that procurement activities are dealt with at the appropriate level.

A register of procurement authority limits will be maintained by the Finance One System Administrator in Information Technology Department.

6.3 Delegations to CEO and ELT

Council has delegated certain functions and approvals to the CEO and Council's Instrument of Delegation to the CEO includes specific limitations on the CEO's authority to approve certain purchases, tender, quotation and contractual processes without prior referral to Council.

The limitations are reflected in the CEO's sub-delegations to members of ELT and these delegations, together with this Policy, set out the procurement authority limits of the CEO and ELT.

The instruments of delegation to the CEO and ELT are reviewed regularly and updated as required.

6.4 Procurement authority statements

Notwithstanding section 6.3, authorisation to expend funds or approve expenditure (whether by purchasing card, purchase order, manual payment requisition, petty cash or otherwise) is approved by the Council staff member's respective Manager and/or Director (depending on the staff member's level in the organisation) and authorised by the Chief Financial Officer.

Council staff, other than the CEO and ELT, who apply for access to Council's corporate purchasing system or a purchasing card, will receive a Procurement Authority Statement which clearly outlines the extent of their authority to make procurement commitments in respect of goods, services or works on behalf of Council. Procurement Authority Statements will be issued by the Commercial and Property Services Department, normally as part of the initial financial systems training provided to new staff.

7 INTERNAL CONTROLS

Council will install and maintain a framework of internal controls over procurement processes, including regular internal audit review, which will ensure:

- more than one person is involved in and responsible for a transaction end to end;
- transparency in the procurement process;
- a clearly documented audit trail exists for procurement activities;
- appropriate authorisations are obtained and documented; and
- systems are in place for appropriate monitoring and performance measurement.

8 COMMERCIAL INFORMATION

Procurement activities will be carried out in a way that supports Council staff in meeting their obligations to ensure information of a commercially sensitive or confidential nature is obtained, stored, processed, published (where applicable) in an appropriate manner.

9 RISK MANAGEMENT

9.1 General

Risk Management is to be appropriately applied at all stages of procurement activities which will be properly planned and carried out in a manner that will protect and enhance Council's capability to prevent, withstand and recover from interruption to the supply of goods, services and works.

9.2 Supply by contract

The provision of goods, services and works by contract potentially exposes Council to risk.

Council will minimise its risk exposure by measures such as:

- use of standard-form contracts where appropriate. Council's standard-form contracts are provided by Council's Legal Services Department. Initial enquiries regarding Council's current standard-form contracts should be directed to the Commercial and Property Services Department (refer section 9.4);
- ensuring contracts are updated where appropriate to include current, relevant clauses;
- use of or reference to relevant Australian Standards (or equivalent), where appropriate;
- referring specifications to relevant experts for review, where considered appropriate;
- evaluating and selecting contractors whose operations are aligned with Council's specified occupational health and safety standards and systems of work; and who are appropriately experienced, licensed, qualified and have the required levels of appropriate insurances (workers compensation, public liability, professional indemnity);
- requiring security deposits, where appropriate;
- requiring contractual agreement before allowing the commencement of work; and
- effectively managing the contract including monitoring and enforcing performance.

9.3 Health and safety considerations

Council procurement shall consider associated health and safety risks associated with goods, works and services and these considerations shall include the following as appropriate:

- Council's policies, procedures and systems related to OH&S contractor management;
- the need to ensure the health and safety of employees, contractors, visitors and the public at all times during Council operations;
- evaluation and verification of health and safety documentation related to the goods, services or works to be procured. This documentation may include manufacturers' and/or suppliers' risk assessments, process safe work method statements, specified regulatory requirements, equipment service records, substance safety data sheets, and any other documentation required by Council as a result of associated risk assessments conducted..
- selection of contractors whose safe management systems and operations are suitably aligned with the determined risk rating and hazards associated with the goods, services and/or works to be procured; and
- effective management including monitoring of the contract.

9.4 Contractual terms and conditions

All contractual relationships must be documented in writing and it is strongly recommended that these be based on Council's standard terms and conditions. These standard terms and conditions are written to protect Council's interests and ensure Council is not exposed to unacceptable risks.

Council has a number of different standard-form contracts to cover different types of procurement including annual supply services, construction, consultancy, information technology (IT) products. Typically these will be either contract documents provided by Council's Legal Services Department or contract documents licenced for use by Council from third party organisations. The latter instance would, for example, include the Australian Standard forms of construction contract.

To protect the interests of Council, contractual terms and conditions must be settled in advance of any commitment being made with a supplier. To facilitate this, Council's proposed contractual terms and conditions must be issued as part of any request for quotation or tender documentation to ensure that potential suppliers are fully aware of the contractual terms and conditions that will be the basis of any contractual relationship between the parties.

9.4.1 Use of other than Council's standard contractual terms and conditions

It is recognised that there may be occasions when it is appropriate to consider changes to Council's standard terms and conditions or the use of a supplier's own standard terms and conditions. For example,

- where elements of Council's standard terms and conditions may not be well suited to a particular procurement or may be of major concern to a supplier;
- where Council's standard levels of insurance may not be commensurate with the scope of the work required; or
- use of a supplier's own standard terms and conditions for IT software based solutions including licensing agreements or equipment lease agreements where Council may rely on a leasing company's Master Lease Agreement.

Under these circumstances, Council staff may consider alternative terms and conditions provided that any such changes do not adversely impact Council's interests or expose Council to substantial or unacceptable risks. Use of alternative terms and conditions must be approved by the relevant Director. Any consideration must take into account issues including the nature of the specific work to be undertaken, an assessment of the possible risks to Council associated with that work and any possible flow-on consequences that may arise from the work. For example, faulty design work could have major consequences for subsequent construction work based on that design.

Council staff must not agree to any changed contractual terms and conditions without prior written approval of their Director. In seeking this approval, staff must undertake the above-mentioned assessment and, in the event that the Director supports accepting changed contractual terms and conditions, the assessment is to be documented and forwarded to the Manager Commercial and Property Services for review. The Manager Commercial and Property Services may recommend further assessment such as seeking specialist advice from risk management and/or Legal Services. The Director shall be responsible to undertake any additional assessment recommended.

In the event that there are differing opinions as to the acceptability of any proposed contractual terms and conditions or the level of assessment required, the final decision will rest with the Director in question.

10 ENDORSEMENT

Council staff must not endorse any products or services. Individual requests received for endorsement must be referred to the relevant Director or CEO level for prior approval.

11 DISPUTE RESOLUTION

All Council contracts shall incorporate dispute management and alternative dispute resolution provisions to minimise the chance of disputes escalating and leading to legal action.

12 PERFORMANCE MEASURES AND CONTINUOUS IMPROVEMENT

Appropriate performance measures are to be established and reporting systems will be used to monitor performance and compliance with procurement policies, procedures and controls.

Procurement procedures, practices and costs may be benchmarked externally, where appropriate. Internal service standards may also be agreed within Council where appropriate and performance against these targets measured and reviewed regularly to support continuous improvement.

The performance measurements developed will be used to:

- highlight trend and exceptions where necessary to enhance performance;
- improve the internal efficiency of the procurement process and where relevant the performance of suppliers; and

- facilitate programs to drive improvement in procurement to eliminate waste and inefficiencies across key spend categories.

13 CORPORATE SOCIAL RESPONSIBILITY

Corporate social responsibility is about taking positive action to demonstrate Council's commitment to the local community and the environment on which it impacts. Council aims to maximise the benefits of the services it provides across the community and minimise the negative aspects of its activities.

Council integrates corporate social responsibility into its organisational policies and practices through initiatives such as social procurement, sustainability and diversity.

14 SOCIAL PROCUREMENT

Social procurement involves using procurement processes and purchasing power to not only deliver efficient goods/services/works but also to generate positive social outcomes.

Council understands the benefits that social procurement can generate by building on initiatives already undertaken by Council in enhancing sustainable and strategic procurement practice, further enabling procurement to effectively contribute towards building stronger communities and meeting the social objectives of Council.

It is recognised that social procurement objectives may have other implications such as financial. Accordingly it is important that social procurement objectives are determined prior to the associated procurement to ensure they are appropriately considered during that procurement process.

Further details and examples of social procurement initiatives are available in the Local Government section of the Department of Transport, Planning and Local Infrastructure website at the following link: <http://www.dtpli.vic.gov.au/local-government/strengthening-councils/social-procurement>.

15 SUSTAINABILITY

15.1 General

Council is committed to reducing its environmental impacts and operating in a socially and environmentally sustainable manner. To work towards this, Council will monitor and report on Council activities and programs that have an impact on, or contribute to the environment. This includes but is not limited to:

- waste management;
- recycling;
- energy management;

- emissions management;
- water conservation;
- building design; and
- environmentally preferable procurement.

15.2 Environmentally sustainable procurement

Council is committed to adopting a green procurement approach by supporting the principles of sustainable procurement. Council prefers to purchase environmentally preferred products whenever they achieve an equivalent function. Assessment of Best Value includes consideration of the environmental impacts and credentials of goods, services and works. Within this context Council will consider the following environmental sustainability criteria:

- Reduce, reuse, and recycle
 - avoid unnecessary purchase of goods, services or works through identifying ways to carry out a function or task without using materials that generate waste (e.g. sending information via email instead of paper) and checking stores and other Departments for excess goods.
 - select products that reduce the amount of materials required such as packaging and consumables.
 - seek to re-use items where possible and extend the useful life of products and equipment through maintenance and repair or re-allocation.
 - seek to buy recycled/part-recycled products that optimise consumption and stimulate demand for recycled products, promoting the collection and reprocessing of waste and working towards zero discharge to landfill.
- Minimise energy consumption and greenhouse gas emissions
 - select electrical and gas powered products which are energy efficient. For all product categories covered under the Australian Government's Equipment Energy Efficiency rating scheme (e.g. televisions, refrigerators, dishwashers, computers/monitors, air conditioners, washers/dryers) prefer products that are within one star of best available rating. Refer <http://www.energyrating.gov.au/>
 - select fuel efficient products and for plant and equipment specifically consider products which are more environmentally sustainable
 - in addition to operational energy efficiency, consider the energy and water requirements of a product during its production, transportation and eventual disposal.
- Minimise habitat destruction
 - purchase paper and wood products obtained from recycled, plantation, salvaged or renewable sources.

- Minimise toxicity
 - purchase materials and products (e.g. Paints, cleaning products, herbicides, asphalt, building materials) that minimise or eliminate use or release of toxic substances that can affect human health and pollute water, land or air at any stage of their life cycle.
- Minimise use of potable water
 - select products that conserve water or use water in an efficient way. For products covered under the Australian Government's Water Efficiency Labelling and Standards (WELS) scheme (e.g. Taps, toilets/urinals, dishwashers) prefer products that are within one star of best available. Refer <http://waterating.gov/>
- Green the supply chain
 - develop tender, quotation and contract specifications that encourage suppliers to adopt good environmental and management practices that also respect the rights of all employees and the local community.
- Use of Fairtrade products
 - where practicable, Council will procure certified products (e.g. tea, coffee, chocolate, garments) which support farmers, their families and communities in developing nations in receiving more stable and secure incomes, better working conditions, and enhanced investment in quality and local environmental sustainability.

For buildings specifically, Council's Sustainable Council Buildings Policy sets out clear commitments for achieving improved sustainability standards in the way Council's buildings are planned, designed, built, used and maintained. This Policy includes requirements regarding managing demand for new building spaces, facilitating optimal and sustainable use of our existing buildings, ensuring design and construction of sustainable buildings including planning for climate change and landscaping appropriately for the intended use and local context, and supporting common-sense 'like for better' sustainability opportunities through building maintenance and upkeep. For procurement of building works, a 5 star green star design and as-built rating has been established as the default minimum requirement for building works greater than \$1 million.

16 DIVERSITY

Promoting equality through procurement can improve competition, value for money, the quality of public services, satisfaction among users, and community relations. It should be a consideration in every procurement project and reflect corporate commitment to diversity and equal opportunities wherever possible.

17 SUPPORT OF LOCAL BUSINESS

Council supports buying goods and services from local business and/or business employing Boroondara residents. In assessing Best Value to be delivered by competing competitive offerings, all else being equal, Council will support such local businesses.

Council also acknowledges its obligations under s186 (6) of the Act to, whenever practicable, give preference to contracts for the purchase of goods and services manufactured or produced in Australia or New Zealand. In assessing Best Value to be delivered by competing competitive offerings, Council will support products supplied by Australian owned enterprises.

18 CONTINUAL IMPROVEMENT

Council is committed to continuous improvement and will review this Procurement Policy both in accordance with the Act, and as necessary to ensure that it continues to meet its wider strategic objectives.

19 POLICY RESPONSIBLE OFFICER AND OTHER CONTACT DETAILS

Manager Commercial and Property Services is the designated responsible officer of this Policy. The responsible officer coordinates the implementation, maintenance and review of this Policy and ensures that stakeholders are aware of their accountabilities.

For further information or queries or feedback on this Policy, please contact the above responsible officer via email managercommercialproperty@boroondara.vic.gov.au or telephone (03) 9278 4444.

19.1 Other contact details

Other relevant contact details referred to in this Policy are as follows:

- Protected Disclosure Coordinator
Manager Governance
Telephone:(03) 9278 4444
Email: protecteddisclosure@boroondara.vic.gov.au
- Chief Executive Officer
