### Materials

- Plant cuttings (*tip: succulent is a great plant to use*)
- Pruning shears or sharp knife
- Pot or upcycle container, tin or jar (*tip: decorate it to make it unique*)
- Potting mix
- Gardening gloves

### Instructions

1. Cut your plant cutting, making sure it's between 3-6 inches long. Keep the cutting cool or moist until you pot it.
2. Take your pot or container and fill it up with the potting mix. Water it if it is too dry.
3. Take your cutting and remove the lower leaves and place it in the centre of the potting mix.
4. To help it grow, create a mini greenhouse by placing your cutting in a clear plastic bag.
