

Recyclables Collection and Processing Services Contract No. 2021/144

The Cities of Boroondara and Stonnington are committed to advancing a circular economy and best practice waste management. We pride ourselves in delivering services to our communities that value the environment, people, and local economy. We strive to continuously improve and challenge 'business as usual'.

We are conducting a collaborative procurement and tender process for Recyclables Collection and Processing Services throughout both municipalities. These services are:

- Contract One: Recycling Collection and Related Services
- Contract Two: Recycling Processing

Both Councils intend to separately contract these two services.

Inspections and pre-tender briefing sessions will be conducted by appointment only between 13-17 December 2021.

Documents detailing the specific requirements are available electronically for download at www.boroondara.vic.gov.au/tenders .

Tenders close at 4pm, Friday 28 January 2022.

We welcome prospective tenderers to work with us and our community to maximise diversion from landfill and progress recycling.

The lowest or any offer will not necessarily be accepted.
