

Precinct Statement

Adopted 24 September 2012, updated October 2013

DESCRIPTION

Precinct 16 is bounded by Cotham Road to the north and Barkers Road to the south. This moderately sized precinct is situated on slightly sloping land in Kew and contains several schools such as Xavier College, Methodist Ladies' College, Ruyton Girls' School and Carey Baptist Grammar School. The precinct also adjoins Alexandra Gardens.

A large portion of the precinct is located within the Glenferrie Hill heritage overlay area (HO150) which contains a high number of Victorian dwellings. There is also a small area in the north-west of the precinct which is proposed for heritage protection. The precinct contains

a variety of Federation, interwar, post war and contemporary dwellings.

Most dwellings are single storey, however some taller buildings are present, generally in the form of upper level additions. The scale varies in streets adjoining school buildings which have a more eclectic feel.

Lot frontages range between 5m to 10m for the Victorian cottages to 10 to 20m for some of the later dwellings. Front setbacks are generally 5 to 9m, however smaller setbacks are also present in some streets. Building and roof materials vary. Where on-site car parking exists, its location varies from house to house.

Front fences are generally low to medium in height. While most houses are detached, side setbacks are often narrow. Some houses are built to the boundary on one side.

The size and number of street trees varies from large canopy trees in some streets to more recent plantings. Front and rear gardens are small, however mature vegetation is common.

The generally narrow front setbacks, close spacing of houses and historic dwellings creates a suburban, historic character.

Design Guidelines

KEY CHARACTERISTICS

- Historic character;
- Predominately single storey houses;
- Mature trees and vegetation present in some areas;
- Small rear gardens
- Generally narrow side setbacks; and
- Variety of lot widths.

PREFERRED CHARACTER STATEMENT

To maintain and enhance the single storey, historic character of the precinct.

This will be achieved by:

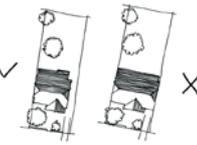

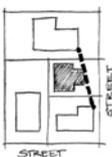

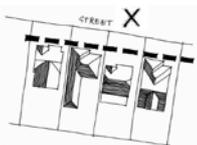

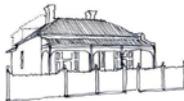

- Ensuring buildings are consistently setback from front boundaries to retain the existing streetscape rhythm.
- Ensuring new developments and additions respect the predominant building scale and forms of the streetscape;
- Encourage design that integrates with the heritage styles of the precinct;
- Ensuring garages and carports do not dominate the streetscape; and
- Encouraging low or open style front fences.

THREATS/ISSUES

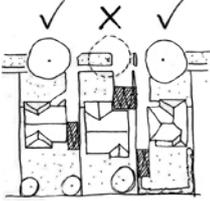

- Loss of historic buildings;
- Buildings that appear bulky and 'box' like;
- New houses that dominate the streetscape;
- Unsympathetic or dominant dwelling extensions;
- Car parking structures in front setbacks that obscure views of the dwelling behind;
- High front fences that disrupt the rhythm of the street; and
- Removal/loss of large trees.

Design Guidelines

TABLE OF ELEMENTS

CHARACTER ELEMENT	OBJECTIVE	DESIGN RESPONSE	AVOID	ILLUSTRATION
VEGETATION	<ul style="list-style-type: none"> To maintain existing mature vegetation and enhance the landscaped setting of dwellings. 	<ul style="list-style-type: none"> Ensure the retention of large trees. Ensure front gardens incorporate soft landscaping that complements the streetscape. 	<ul style="list-style-type: none"> Removal of large trees. Front gardens dominated by hard surfaces. 	 <p><i>Encourage landscaped gardens</i></p>
SITING	<ul style="list-style-type: none"> To maintain the existing streetscape rhythm. To enhance the landscape character of the precinct by providing sufficient space for vegetation. 	<ul style="list-style-type: none"> Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less. Ensure buildings are setback from at least one side boundary in accordance with the prevailing streetscape spacing. Ensure buildings in the Heritage Overlay are setback in line with or behind the adjoining heritage buildings in accordance with Council's heritage policy. Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings. Provide a secluded private open space area with a minimum dimension of 4m to enable the planting and retention of large trees. 	<ul style="list-style-type: none"> Dwellings set too far forward or back. 	 <p><i>Side setbacks</i></p>  <p><i>Siting on corner sites</i></p>  <p><i>Front setbacks</i></p>
BUILDING HEIGHT AND FORM	<ul style="list-style-type: none"> To maintain the predominantly single storey scale and pitched roof character of the precinct. To ensure buildings do not dominate the streetscape or disrupt the existing streetscape rhythm. 	<ul style="list-style-type: none"> Ensure new buildings are composed of facades that contain a single storey element with recessive upper levels. Ensure upper level additions to existing single storey dwellings are sufficiently setback to minimise their visibility. Ensure visible roof forms integrate with the pitched roofs in the streetscape. 	<ul style="list-style-type: none"> Flat or curved roofs. Large bulky buildings or extensions that dominate the precinct's historic buildings and streetscapes. 	 <p><i>Maintain single storey streetscape scale</i></p>  <p><i>Minimise visibility of upper level extensions</i></p>  <p><i>Integrate with pitched roofs</i></p>

Design Guidelines

CHARACTER ELEMENT	OBJECTIVE	DESIGN RESPONSE	AVOID	ILLUSTRATION
FRONT BOUNDARY TREATMENT	<ul style="list-style-type: none"> To maintain the predominant low to medium front fence heights. To ensure fences in front of heritage properties are appropriate to the era and design of the house. To maintain views of front gardens. 	<ul style="list-style-type: none"> Ensure front fences are no more than 1.5m or the average fence height of the four properties on either side (whichever is less). Ensure the retention of original front fences where heritage overlays apply. Front fences along declared main roads (RD1Z) may be up to 2m in height where this is consistent with the prevailing fence height on the neighbouring properties. 	<ul style="list-style-type: none"> High solid front fences. Fence designs that are inappropriate to the era and design of the dwelling. 	 <p><i>Avoid high front fences</i></p>
BUILDING MATERIALS AND DESIGN DETAILS	<ul style="list-style-type: none"> To ensure building materials and facade articulation integrates within the streetscape. 	<ul style="list-style-type: none"> Use building articulation, including contemporary materials that integrate with the streetscape character. Ensure the integration of front verandas and awnings into the facade design where this is a characteristic of the streetscape. Ensure materials, colours and facade articulation, including the size and spacing of windows, integrates with the streetscape. Ensure new dwellings and visible additions complement the historic buildings in the precinct. Ensure rooflines of new buildings, extensions and additions incorporate sloping roofs with greater than 10 degrees roof slope and reflect the existing character of surrounding dwellings. 	<ul style="list-style-type: none"> Bland design such as sheer or plain rendered facades. Large areas of glazing to the street. 	 <p><i>Integrate with heritage streetscapes</i></p> <p><i>Avoid bland design</i></p>
CAR PARKING STRUCTURES	<ul style="list-style-type: none"> To minimise the dominance of car parking structures. To ensure basement garages do not increase the visual bulk of buildings. 	<ul style="list-style-type: none"> Ensure car parking structures, including entrances to basements, are setback at least 1m behind the dwelling facade and are designed to minimise their prominence. Ensure basements project no more than 0.5m above natural ground level, unless the finished floor level of abutting properties is greater than 0.5m. Ensure basement garages are accessed from side or rear lane ways where possible. Ensure basement entrances are setback at least 5m from the primary street frontage and 1m behind the front wall of the building. 	<ul style="list-style-type: none"> Driveways and car parking structures that dominate front setbacks or obscure views of the dwelling. Basement ramps that commence at the street frontage. Basement garages that result in buildings with a 2.5 to 3 storey appearance from the street. Basement garages accessed from the primary street frontage on lots with a frontage less than 10m wide. 	 <p><i>Location of car parking structures</i></p>

General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City's residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area's landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct's preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area's preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the "objective", "design response" and "avoid" columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant "design response" or "avoid" criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council's Heritage

Policy, the provisions of the Design and Development Overlay or Council's Heritage Policy will take precedence.

Glossary

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** – refers to building height (as measured from natural ground level), roof form and the massing of building elements.
- **Building Materials and Design Details** – refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.
- **Car Parking Structures** – refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.
- **Front Boundary Treatment** – refers to the presence, height and style of front fences.
- **Lot Frontage** – refers to the width of lots.
- **Siting** – refers to front setbacks, side setbacks and the area's rear garden character.
- **Vegetation** – refers to the trees and landscaping on the site.

GENERAL TERMS

- **'Box'-like** – refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.
- **Historic Buildings** – refers to early buildings that date from the establishment of the area or that are important to the area's history.
- **Heritage Buildings** – refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.
- **Period Reproduction Design** – refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.
- **Front Setback** – The distance between the front property boundary and the dwelling, categorised as:
 - **Small:** 0 to 5 metres
 - **Medium:** 5 to 9 metres
 - **Large:** 9+ metres
- **Front Fence Height:**
 - **Low:** 0.5 to 1.2m high
 - **Medium:** 1.2m - 1.5m high
 - **High:** over 1.5m high
- **Roof Forms:**
 - **Flat** – refers to a roof with a gradient of 10 degrees or less.
 - **Pitched** – refers to a roof with two slopes that meet at a central ridge.
- **Multi-Unit Dwellings:**
 - **Flats / Apartment Buildings** – refers to several dwellings contained in a multi-storey structure.
 - **Town Houses** – refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
 - **Villas** – refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.
