Precinct Statement
Adopted 24 September 2012, updated October 2013

DESCRIPTION
Precinct 18 is located in Kew and contains Genazzano College and Reservoir Reserve.

The precinct has a rectilinear street pattern on land that is slightly sloping. Part of the precinct is located in the Sackville Street heritage overlay area (HO162) which is characterised by Victorian, Federation and interwar housing, including several large mansions. There are also a range of new dwellings scattered throughout the precinct.

Front fence heights are generally low to medium, however some higher fences are present as well. Front setbacks are generally 5 to 9m, with the exception of Sackville Street where setbacks are often greater than 9m. Lot frontages vary from 10 to 20m creating medium to large front gardens, some of which are densely planted.

Streets are generally wide with some narrow laneways. Street trees are numerous and often mature, creating a wide canopy over the street.

Despite the various building styles, housing is generally detached and 1 or 2 storeys in height with side setbacks of at least 1 metre. Most dwellings are constructed from masonry materials with pitched roofs. Some of the newer dwellings feature period reproduction detailing.

While many rear gardens have been developed with buildings or tennis courts, many feature mature vegetation that contributes to the greenery of the area.
Design Guidelines

KEY CHARACTERISTICS

- 1 to 2 storey, detached dwellings;
- Mixture of historic and contemporary dwellings;
- Pitched roofs;
- Numerous street trees;
- Medium to large front gardens; and
- Medium to large rear gardens, often developed with tennis courts.

PREFERRED CHARACTER STATEMENT

To maintain the significance of the historic houses in the precinct and the 1 and 2 storey scale, detached character and garden setting of dwellings. This will be achieved by:
- Encouraging the retention of large trees and landscaped gardens;
- Ensuring sufficient space is retained in front and rear gardens to accommodate large trees;
- Ensuring buildings are sufficiently setback from front and side boundaries to retain the existing streetscape rhythm.
- Ensuring new developments and additions respect the predominant building scale and forms of the streetscape;
- Encouraging design that integrates with the heritage styles of the precinct;
- Ensuring car parking structures do not dominate the streetscape;
- Maximising soft landscaping and minimising areas of hard surfaces; and
- Encouraging low or open style front fences.

THREATS/ISSUES

- Loss of historic buildings;
- Boundary to boundary development;
- New houses that dominate the streetscape;
- Unsympathetic or dominant dwelling extensions;
- Lack of soft landscaping / vegetation;
- High front fences that disrupt the rhythm of the street;
- Car parking structures in front setbacks that obscure views of the dwelling behind;
- Removal / loss of large trees; and
- Period reproduction styles.
# Design Guidelines

## TABLE OF ELEMENTS

<table>
<thead>
<tr>
<th>Character Element</th>
<th>Objective</th>
<th>Design Response</th>
<th>Avoid</th>
<th>Illustration</th>
</tr>
</thead>
</table>
| **Vegetation**    | • To maintain and enhance the landscaped setting of dwellings. | • Ensure front gardens incorporate soft landscaping that complements the streetscape.  
• Ensure retention of large trees. | • Removal of large trees.  
• Front gardens dominated by hard surfaces.  
• Loss of front gardens. | Encourage landscaped gardens |
| **Siting**        | • To maintain the existing detached streetscape rhythm.  
• To maintain the existing well vegetated backyard character. | • Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less.  
• Ensure buildings in the heritage overlay are setback in line with or behind the adjoining heritage buildings in accordance with Council’s Heritage Policy.  
• Ensure buildings are setback from both side boundaries in accordance with the prevailing streetscape spacing.  
• Ensure buildings are sufficiently setback from rear boundaries to maintain the open, backyard character of the immediate area where this exists.  
• Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings.  
• Provide a secluded private open space with a minimum dimension of 4m to enable the planting and retention of large trees. | • Dwellings set too far forward.  
• Boundary to boundary development.  
• Dwellings built to or close to their rear boundary with other residential properties. | Side setbacks  
Siting on corner sites  
Front setbacks |
| **Building Materials and Design Details** | • To ensure building materials and façade articulation integrates within the streetscape.  
• To minimise period reproduction design. | • Use building materials that integrate with the streetscape character.  
• Ensure new dwellings and visible additions complement the historic buildings in the precinct.  
• Break buildings into separate elements and use eaves, overhangs and other design details to articulate the façade.  
• Ensure rooflines of new buildings, extensions and additions incorporate sloping roofs with greater than 10 degrees roof slope and reflect the existing character of surrounding dwellings. | • Bland design such as sheer or plain rendered façades.  
• Period reproduction design. | Integrate with heritage streetscapes  
Avoid bland design |
| **Front Boundary Treatment** | • To enhance the consistency of front fence heights and maintain views of front gardens.  
• To ensure fences in front of heritage properties are appropriate to the era and design of the house. | • Ensure front fences are no more than 1.5m or the average fence height of the four properties on either side (whichever is less).  
• Front fences along declared main roads (RD1Z) may be up to 2m in height where this is consistent with the prevailing fence height on the neighbouring properties.  
• Ensure the retention of original front fences where heritage overlays apply. | • High solid front fences.  
• Fence designs that are inappropriate to the era and design of the dwelling. | Avoid high front fences |

</table>

| CAR PARKING STRUCTURES  | To minimise the loss of front gardens and the dominance of car parking structures. | Ensure car parking structures, including entrances to basements, are setback at least 1m behind the dwelling facade and are designed to minimise their prominence. | Driveways and car parking structures that dominate the front setback or obscure views of the dwelling. |
|                         | To ensure basement garages do not increase the visual bulk of buildings.         | Ensure basements project no more than 0.5m above natural ground level, unless the finished floor level of abutting properties is greater than 0.5m. | Wide garages and carports that dominate the front façade.                                    |
|                         |                                                                                   | Where possible, locate the entry to basement garages to the side or rear of dwellings so they are not visible from the street. | Adjoining garage doors facing the street in side-by-side townhouses.                           |
|                         |                                                                                   |                                                                                                               | Basement ramps that commence at the street frontage.                                         |
|                         |                                                                                   |                                                                                                               | Basement garages that result in buildings with a 2.5 to 3 storey appearance from the street.  |
|                         |                                                                                   |                                                                                                               | Driveways, basements and ramps that cover the extent of the site.                            |
|                         |                                                                                   |                                                                                                               |                                             |
|                         |                                                                                   |                                                                                                               |                                             |

This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.
General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City's residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area’s landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct’s preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area’s preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.
Glossary

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** — refers to building height (as measured from natural ground level), roof form and the massing of building elements.

- **Building Materials and Design Details** — refers to external building materials, façade articulation and design elements such as verandas, awnings, window configurations and eaves.

- **Car Parking Structures** — refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.

- **Front Boundary Treatment** — refers to the presence, height and style of front fences.

- **Lot Frontage** — refers to the width of lots.

- **Siting** — refers to front setbacks, side setbacks and the area’s rear garden character.

- **Vegetation** — refers to the trees and landscaping on the site.

GENERAL TERMS

- **‘Box’-like** — refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.

- **Historic Buildings** — refers to early buildings that date from the establishment of the area or that are important to the area’s history.

- **Heritage Buildings** — refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.

- **Period Reproduction Design** — refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.

- **Front Setback** — The distance between the front property boundary and the dwelling, categorised as:
  - **Small**: 0 to 5 metres
  - **Medium**: 5 to 9 metres
  - **Large**: 9+ metres

- **Front Fence Height** —
  - **Low**: 0.5 to 1.2m high
  - **Medium**: 1.2m - 1.5m high
  - **High**: over 1.5m high

- **Roof Forms** —
  - **Flat** — refers to a roof with a gradient of 10 degrees or less.
  - **Pitched** — refers to a roof with two slopes that meet at a central ridge.

- **Multi-Unit Dwellings**:
  - **Flats / Apartment Buildings** — refers to several dwellings contained in a multi-storey structure.
  - **Town Houses** — refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
  - **Villas** — refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.

FURTHER INFORMATION
