Precinct Statement
Adopted 24 September 2012, updated October 2013

DESCRIPTION
Precinct 20 is a medium sized precinct of medium to high consistency located in Canterbury and Balwyn. The precinct contains Monomeath Avenue, most of which is subject to Design and Development Overlay 4 which prohibits subdivision.

Overall, dwellings in the precinct date from all eras of the City's history, and there are a number of heritage listed sites across the area. Houses are predominantly 2 storeys and are generally very large in size. Many of the newer houses exhibit period reproduction detailing.

Roofs are generally pitched with terracotta or concrete tiles. The dominant front setback is 9m or greater, while side setbacks are predominantly 1m to 3m. The height of the front fences varies, however high fences are common.

Front gardens are generally large and are quite densely landscaped. While many rear gardens are developed with tennis courts, swimming pools and other structures, most retain some mature trees that contribute to the leafy feel of the area.

Allotments are generally large with frontages 20m wide or greater in many instances.

The street trees present are predominately deciduous and numerous in number, providing the precinct with substantial canopy cover which contributes to a leafy, green feel. The often opulent building design, large houses, large front gardens, strong vegetation and narrow streets with many trees creates a grand character.

This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.
Design Guidelines

KEY CHARACTERISTICS

- Mixture of dwelling eras;
- Large, 2 storey detached houses;
- Large front setbacks, often over 9m;
- Generously landscaped front gardens;
- Substantial canopy cover;
- Increasing presence of period reproduction design;
- Large rear gardens, often developed with swimming pools, tennis courts and other structures;
- Broad lot frontages; and
- Medium to high front fences.

PREFERRED CHARACTER STATEMENT

To facilitate contemporary design that maintains the 2 storey scale of the area and enhances the leafy, mature garden setting of dwellings.

This will be achieved by:

- Encouraging the retention of large trees and landscaped gardens;
- Ensuring sufficient space is retained in front and rear gardens to accommodate large trees;
- Ensuring buildings are sufficiently setback from front and side boundaries to retain the existing spacious, garden character and detached streetscape rhythm.
- Ensuring new developments and additions respect the predominant building scale and forms of the streetscape;
- Ensuring garages and carports do not dominate the streetscape;
- Maximising soft landscaping and minimising areas of hard surfaces; and
- Encouraging contemporary design in preference to period reproduction design.

THREATS/ISSUES

- Boundary to boundary development;
- Lack of soft landscaping / vegetation;
- High front fences that prevent views of front gardens and that disrupt the rhythm of the street;
- Removal / loss of large trees;
- Car parking structures in front setbacks that obscure views of the dwelling behind; and
- Period reproduction building design in more consistent interwar streetscapes.

This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.

</table>
| **VEGETATION**     | • To maintain and enhance the well landscaped setting of dwellings. | • Ensure front gardens incorporate soft landscaping that complements the streetscape.  
• Ensure the retention of large trees. | • Removal of large trees.  
• Front gardens dominated by hard surfaces  
• Loss of front gardens. | ![Encourage landscaped gardens](image) |
| **SITING**         | • To maintain and enhance the existing streetscape rhythm and sense of spaciousness.  
• To maintain the existing spacious backyard character and enhance the area’s leafy feel. | • Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less.  
• Ensure buildings are setback from both side boundaries in accordance with the prevailing streetscape spacing.  
• Ensure buildings are sufficiently setback from rear boundaries to maintain the open, backyard character of the immediate area where it exists.  
• Provide a secluded private open space area with a minimum dimension of 4m to enable the plating and retention of large trees.  
• Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings.  
• Give preference to units set one behind the other as opposed to side by side townhouses. | • Dwellings set too far forward.  
• Boundary to boundary development.  
• Dwellings built to or close to their rear boundary with other residential properties. | ![Side setbacks](image)  
![Siting on corner sites](image)  
![Front setbacks](image)  
![Siting of units](image) |
| **BUILDING HEIGHT AND FORM** | • To maintain the existing predominantly two storey scale of the precinct.  
• To ensure buildings do not disrupt the existing streetscape rhythm. | • Ensure new buildings are composed of façades that are no more than two storeys high to the street.  
• Ensure unit development is designed one behind the other, or side by side to read as one dwelling within the streetscape.  
• Ensure attached side by side development is designed to read as one dwelling within the streetscape. | • Three storey façades to the street.  
• Symmetrical presentation of side by side townhouses. | ![Maintain double storey streetscape scale](image)  
![Avoid symmetrical design](image)  
![Avoid 3 storey façades](image) |

<td><strong>BUILDING MATERIALS AND DESIGN DETAILS</strong></td>
<td>• To ensure building materials and articulation complements and enhances the character of the streetscape. • To minimise period reproduction design.</td>
<td>• Ensure new dwellings and visible additions complement the historic buildings in the precinct. • Break buildings into separate elements and use eaves, overhangs and other design details to articulate the façade.</td>
<td>• Bland design such as sheer or plain rendered façades. • Period reproduction design where not characteristic of the streetscape.</td>
<td><img src="image" alt="Avoid bland design" /></td>
</tr>
</tbody>
</table>

| **FRONT BOUNDARY TREATMENT** | • To encourage front fences that maintain views of front gardens. • To ensure fences in front of heritage properties are appropriate to the era and design of the house. | • Ensure fences higher than 1.5m are transparent. • Front fences along declared main roads (RD1Z) may be up to 2m in height where this is consistent with the prevailing fence height on the neighbouring properties. | • High solid front fences. • Fence designs that are inappropriate to the era and design of the dwelling. | ![Avoid high front fences](image) |

| **CAR PARKING STRUCTURES** | • To minimise the loss of front gardens and the dominance of car parking structures. • To ensure basement garages do not increase the visual bulk of buildings. | • Ensure car parking structures, including entrances to basements, are setback at least 1m behind the dwelling facade and are designed to minimise their prominence. • Ensure basements project no more than 0.5m above natural ground level, unless the finished floor level of abutting properties is greater than 0.5m. • Where possible, locate the entry to basement garages to the side or rear of dwellings so they are not visible from the street. | • Driveways and car parking structures that dominate the front setback or obscure views of the dwelling. • Adjoining garage doors facing the street in side-by-side townhouses. • Basement ramps that commence at the street frontage. • Basement garages that result in buildings with a 2.5 to 3 storey appearance from the street. • Driveways, basements and ramps that cover the extent of the site. | ![Location of car parking structures](image) ![Avoid adjoining garages](image) |
General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City’s residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area's landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct's preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area's preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.
Glossary

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** – refers to building height (as measured from natural ground level), roof form and the massing of building elements.
- **Building Materials and Design Details** – refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.
- **Car Parking Structures** – refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.
- **Front Boundary Treatment** – refers to the presence, height and style of front fences.
- **Lot Frontage** – refers to the width of lots.
- **Siting** – refers to front setbacks, side setbacks and the area’s rear garden character.
- **Vegetation** – refers to the trees and landscaping on the site.

GENERAL TERMS

- **‘Box’-like** – refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include shear two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.
- **Historic Buildings** – refers to early buildings that date from the establishment of the area or that are important to the area’s history.
- **Heritage Buildings** – refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.
- **Period Reproduction Design** – refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.
- **Front Setback** – The distance between the front property boundary and the dwelling, categorised as:
  - Small: 0 to 5 metres
  - Medium: 5 to 9 metres
  - Large: 9+ metres
- **Front Fence Height**
  - Low: 0.5 to 1.2m high
  - Medium: 1.2m - 1.5m high
  - High: over 1.5m high
- **Roof Forms**
  - Flat – refers to a roof with a gradient of 10 degrees or less.
  - Pitched – refers to a roof with two slopes that meet at a central ridge.
- **Multi-Unit Dwellings**:
  - **Flats / Apartment Buildings** – refers to several dwellings contained in a multi-storey structure.
  - **Town Houses** – refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
  - **Villas** – refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.
