Precinct Statement
Adopted 24 September 2012, updated October 2013

DESCRIPTION

Precinct 48 is located in Surrey Hills and Camberwell and contains St Dominic’s Primary School and South Surrey Park. The precinct is also close to Wattle Park in the City of Whitehorse.

The precinct contains 1 and 2 storey dwellings, many of which date from the interwar period, particularly in the blocks south of Riversdale Road. A number of new dwellings are scattered throughout the precinct of various styles.

Houses are generally detached with side setbacks 1 to 3m wide. Front setbacks are generally between 5 and 9m deep.

Roof forms are generally pitched, often with relatively steep front and transverse gables.

Dwellings generally contain moderate sized front gardens and spacious rear gardens which contribute to the area’s traditional suburban feel. Front fences are generally low.

Building materials vary, however, timber is common.

Vegetation is a mix of native and deciduous trees, with most streets lined with medium to large, generally native street trees. Mature trees are also characteristic on private land.
Design Guidelines

KEY CHARACTERISTICS
- Variety of eras, including a large number of interwar dwellings;
- Detached, 1 and 2 storey dwellings;
- Pitched roofs;
- Moderate lot frontages;
- Medium front setbacks;
- Landscaped front gardens;
- Large rear gardens; and
- Low front fencing.

PREFERRED CHARACTER STATEMENT
To maintain the 1 and 2 storey, detached character of the precinct and enhance the leafy, garden setting of dwellings.

This will be achieved by:
- Encouraging the retention of large trees and landscaped gardens;
- Ensuring sufficient space is retained in front and rear gardens to accommodate large trees;
- Ensuring buildings are sufficiently setback from front and side boundaries to retain the existing streetscape rhythm;
- Ensuring new developments and additions respect the predominant building scale and forms of the streetscape;
- Ensuring car parking structures do not dominate the streetscape;
- Maximising soft landscaping and minimising areas of hard surfaces;
- Enhancing the consistency and character of streetscapes; and
- Encouraging low front fences.

THREATS/ISSUES
- Buildings that appear bulky and ‘box’ like;
- Boundary to boundary development;
- Two or three storey developments that dominate the streetscape;
- Lack of garden space for plantings;
- Car parking structures in front setbacks that obscure views of the dwelling behind;
- Lack of soft landscaping / vegetation;
- High front fences that disrupt the rhythm of the street; and
- Removal/loss of large trees.
# Design Guidelines

## TABLE OF ELEMENTS

<table>
<thead>
<tr>
<th>CHARACTER ELEMENT</th>
<th>OBJECTIVE</th>
<th>DESIGN RESPONSE</th>
<th>AVOID</th>
<th>ILLUSTRATION</th>
</tr>
</thead>
</table>
| **VEGETATION**    | • To maintain and enhance the landscaped setting of dwellings. | • Ensure front gardens incorporate soft landscaping that complements the streetscape.  
• Ensure the retention of large trees. | • Removal of large trees.  
• Front gardens dominated by hard surfaces.  
• Loss of front gardens. | ![Encourage landscaped gardens](image) |
| **SITING**        | • To maintain and enhance the existing consistent streetscape rhythm and sense of spaciousness.  
• To maintain the existing spacious backyard character. | • Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less.  
• Ensure buildings are setback from both side boundaries in accordance with the prevailing streetscape spacing.  
• Ensure buildings are sufficiently setback from rear boundaries to maintain the open, backyard character of the immediate area where this exists.  
• Provide a secluded private open space area with a minimum dimension of 4m to enable the planting and retention of large trees.  
• Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings. | • Dwellings set too far forward.  
• Dwellings built too close to their rear boundary with other residential properties.  
• Boundary to boundary development. | ![Side setbacks](image)  
![Front setbacks](image)  
![Siting on corner sites](image) |
| **BUILDING HEIGHT AND FORM** | • To maintain the existing one and two storey scale and pitched roof character of the precinct. | • Ensure buildings are composed of facades that are no more than two storeys high to the street.  
• Ensure visible roof forms integrate with the pitched roofs in the streetscape. | • Two storey facades to the street.  
• Large bulky buildings or extensions that dominate the streetscape. | ![Maintain 1 & 2 storey streetscape scale](image)  
![Integrate with pitched roofs](image)  
![Avoid 3 storey facades](image) |

</table>
General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City’s residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area’s landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct’s preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area’s preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.
This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.

Glossary

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** – refers to building height (as measured from natural ground level), roof form and the massing of building elements.
- **Building Materials and Design Details** – refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.
- **Car Parking Structures** – refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.
- **Front Boundary Treatment** – refers to the presence, height and style of front fences.
- **Lot Frontage** – refers to the width of lots.
- **Siting** – refers to front setbacks, side setbacks and the area’s rear garden character.
- **Vegetation** – refers to the trees and landscaping on the site.

GENERAL TERMS

- **‘Box’-like** – refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.
- **Historic Buildings** – refers to early buildings that date from the establishment of the area or that are important to the area’s history.
- **Heritage Buildings** – refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.
- **Period Reproduction Design** – refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.
- **Front Setback** – The distance between the front property boundary and the dwelling, categorised as:
  - Small: 0 to 5 metres
  - Medium: 5 to 9 metres
  - Large: 9+ metres
- **Front Fence Height**
  - Low: 0.5 to 1.2m high
  - Medium: 1.2m - 1.5m high
  - High: over 1.5m high
- **Roof Forms**
  - Flat – refers to a roof with a gradient of 10 degrees or less.
  - Pitched – refers to a roof with two slopes that meet at a central ridge.
- **Multi-Unit Dwellings**:
  - **Flats / Apartment Buildings** – refers to several dwellings contained in a multi-storey structure.
  - **Town Houses** – refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjourn another dwelling.
  - **Villas** – refers to groups of dwellings which have their own entrance and private yard, which may or may not adjourn another dwelling, but which generally share common areas such as driveways and car parking.
