Precinct Statement
Adopted 24 September 2012, updated October 2013

DESCRIPTION

Precinct 5 is a small, highly uniform, hilly precinct in Kew. The precinct contains a new subdivision that formed part of the grounds of the former Kew Residential Services site. Stages 1 and 2 of the development have been substantially completed. The remaining Stages which involve development of the west and north parts of the site are yet to be completed.

The site is covered by a heritage overlay which relates to the historic Kew Residential Services building. However, the developed part of the precinct consists entirely of contemporary 1 and 2 storey town houses with flat roofs and rendered white walls.

Most dwellings are setback less than 1 metre from side boundaries. The front setbacks are predominantly less than 5m and lot frontages are approximately 10 to 18m wide. Front gardens are small. Private open space is provided in the form of small rear and internal courtyards and balconies. Car parking has been integrated into the facade of the town houses.

The streets are narrow and footpaths are predominantly located on only one side of a street. Nature strips feature throughout. Fences are only found on the main roads. The few street trees present are deciduous.

Development Plan Overlay 3 currently applies to the site which requires development to be consistent with the Kew Residential Development Urban Design Framework, October 2003.

The Minister for Planning is currently the responsible authority for the site. This means that any planning permit application within the precinct is considered by the Minister for Planning and delegated officers within the Victorian Department of Planning and Community Development rather than the City of Boroondara.

This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.
General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City's residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area’s landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct’s preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area’s preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.
This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** – refers to building height (as measured from natural ground level), roof form and the massing of building elements.
- **Building Materials and Design Details** – refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.
- **Car Parking Structures** – refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.
- **Front Boundary Treatment** – refers to the presence, height and style of front fences.
- **Lot Frontage** – refers to the width of lots.
- **Siting** – refers to front setbacks, side setbacks and the area’s rear garden character.
- **Vegetation** – refers to the trees and landscaping on the site.

GENERAL TERMS

- **‘Box’-like** – refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.
- **Historic Buildings** – refers to early buildings that date from the establishment of the area or that are important to the area’s history.
- **Heritage Buildings** – refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.
- **Period Reproduction Design** – refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.
- **Front Setback** – The distance between the front property boundary and the dwelling, categorised as:
  - **Small**: 0 to 5 metres
  - **Medium**: 5 to 9 metres
  - **Large**: 9+ metres
- **Front Fence Height**
  - **Low**: 0.5 to 1.2m high
  - **Medium**: 1.2m - 1.5m high
  - **High**: over 1.5m high
- **Roof Forms**
  - **Flat** – refers to a roof with a gradient of 10 degrees or less.
  - **Pitched** – refers to a roof with two slopes that meet at a central ridge.
- **Multi-Unit Dwellings**:
  - **Flats / Apartment Buildings** – refers to several dwellings contained in a multi-storey structure.
  - **Town Houses** – refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
  - **Villas** – refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.
