Precinct Statement
Adopted 24 September 2013, Re-adopted 23 May 2016

DESCRIPTION

Precinct 55 is in Camberwell, generally bounded by Toorak Road, Burke Road, Inglesby Road, Riversdale Road, and the Alamein train line (excluding the Golf Links Estate heritage overlay area). The precinct contains the Sunnyside Estate which contains a concentration of late Edwardian and early interwar dwellings located between Sunnyside and Fairfield avenues.

The precinct is characterised predominantly by 1 and 2 storey dwellings on 10 to 20m wide lots. A number of blocks have been redeveloped and subdivided into multi-unit villas which generally present as single dwellings to the street. The building stock is reasonably mixed as original pre-war and interwar dwellings are gradually losing prominence to newer dwellings built since 1990.

Dominant characteristics include moderate front setbacks of 5m to 9m, side setbacks of 1m to 3m and landscaped front gardens of moderate size. Most roofs are pitched, predominately with terracotta tiles.

Front boundaries are marked by low to medium high front fences of varying styles and materials.

While the size of rear gardens varies, they generally provide space for some landscaping and trees.

Canopy trees and landscaped gardens, coupled with the large, grassy median strips and the regularity of street trees contributes to a spacious, leafy suburban feel.
Design Guidelines

KEY CHARACTERISTICS
- Various building styles and eras;
- 1 and 2 storey detached dwellings;
- Face and rendered brick façades;
- Pitched roofs;
- Medium front setbacks;
- Landscaped front gardens;
- Low to medium high front fencing;
- Rear gardens of various sizes with landscaping and trees;
- Medium to large street trees.

PREFERRED CHARACTER STATEMENT
To facilitate contemporary design that integrates with the precinct’s detached, 1 and 2 storey character and enhances the garden setting of dwellings.

This will be achieved by:
- Encouraging the retention of large trees and landscaped gardens;
- Ensuring sufficient space is retained in front and rear gardens to accommodate large trees;
- Ensuring buildings are sufficiently setback from front and side boundaries to retain the existing streetscape rhythm;
- Ensuring new developments and additions respect the predominant scale and forms of buildings in the streetscape;
- Ensuring car parking structures do not dominate the streetscape;
- Maximising soft landscaping and minimising areas of hard surfaces; and
- Encouraging low or open style front fences.

THREATS/ISSUES
- Boundary to boundary development;
- Buildings that appear bulky and ‘box’ like;
- Dominant new dwellings and upper level extensions;
- Lack of soft landscaping / vegetation;
- High front fences that disrupt the rhythm of the street;
- Removal / loss of large trees;
- Car parking structures in front setbacks that obscure views of the dwelling behind; and
- Period reproduction building design.
# Design Guidelines

## TABLE OF ELEMENTS

<table>
<thead>
<tr>
<th>CHARACTER ELEMENT</th>
<th>OBJECTIVE</th>
<th>DESIGN RESPONSE</th>
<th>AVOID</th>
<th>ILLUSTRATION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>VEGETATION</strong></td>
<td>• To maintain and enhance the landscaped setting of dwellings.</td>
<td>• Ensure front gardens incorporate soft landscaping that complements the streetscape. • Ensure the retention of large trees.</td>
<td>• Removal of large trees. • Front gardens dominated by hard surfaces. • Loss of front gardens.</td>
<td><img src="image" alt="Encourage landscaped gardens" /></td>
</tr>
<tr>
<td><strong>SITING</strong></td>
<td>• To maintain and enhance the existing consistent streetscape rhythm and sense of spaciousness. • To maintain the existing backyard character and enhance the area’s leafy feel.</td>
<td>• Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less. • Ensure buildings are setback from both side boundaries in accordance with the prevailing streetscape spacing. • Ensure buildings are sufficiently setback from rear boundaries to maintain the open, backyard character of the immediate area where this exists. • Provide a secluded private open space area with a minimum dimension of 4m to enable the planting and retention of large trees. • Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings.</td>
<td>• Dwellings set too far forward. • Boundary to boundary development. • Dwellings built to or close to their rear boundary with other residential properties.</td>
<td><img src="image" alt="Side setbacks" /> <img src="image" alt="Front setbacks" /> <img src="image" alt="Siting on corner sites" /></td>
</tr>
<tr>
<td><strong>BUILDING HEIGHT AND FORM</strong></td>
<td>• To maintain the existing one and two storey scale and pitched roof character of the precinct. • To ensure buildings do not dominate the streetscape or disrupt the existing streetscape rhythm.</td>
<td>• Ensure buildings are composed of façades that are no more than two storeys high to the street. • Ensure buildings incorporate roof forms that integrate with the pitched roofs in the street. • Ensure attached side by side development is designed to read as one dwelling within the streetscape.</td>
<td>• Three storey façades to the street. • Large bulky buildings or extensions that dominate the streetscape. • Symmetrical presentation of side by side townhouses.</td>
<td><img src="image" alt="Maintain double storey streetscape scale" /> <img src="image" alt="Integrate with pitched roofs" /> <img src="image" alt="Avoid symmetrical design" /> <img src="image" alt="Avoid 3 storey facades" /></td>
</tr>
</tbody>
</table>
## Design Guidelines

<table>
<thead>
<tr>
<th>CHARACTER ELEMENT</th>
<th>OBJECTIVE</th>
<th>DESIGN RESPONSE</th>
<th>AVOID</th>
<th>ILLUSTRATION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>BUILDING MATERIALS AND DESIGN DETAILS</strong></td>
<td>To ensure building materials and facade articulation integrates within the streetscape.</td>
<td>• Use building materials that integrate with the streetscape character.</td>
<td>• Bland design such as sheer or plain rendered façades.</td>
<td><img src="image" alt="Avoid bland design" /></td>
</tr>
<tr>
<td></td>
<td>To minimise period reproduction design.</td>
<td>• Ensure the use of contemporary design in preference to period reproduction styles. • Break buildings into separate elements and use eaves, overhangs and other design details to articulate the façade.</td>
<td>• Period reproduction design.</td>
<td></td>
</tr>
<tr>
<td><strong>FRONT BOUNDARY TREATMENT</strong></td>
<td>To enhance the consistency of front fence heights and maintain views of front gardens.</td>
<td>• Ensure front fences are no more than 1.5m or the average fence height of the four properties on either side (whichever is less). • Front fences along declared main roads (RD1Z) may be up to 2m in height where this is consistent with the prevailing fence height on the neighbouring properties.</td>
<td>• High solid front fences.</td>
<td><img src="image" alt="Avoid high solid front fences" /></td>
</tr>
<tr>
<td><strong>CAR PARKING STRUCTURES</strong></td>
<td>To minimise the loss of front gardens and the dominance of car parking structures. • To ensure basement garages do not increase the visual bulk of buildings</td>
<td>• Ensure car parking structures, including entrances to basements, are setback at least 1m behind the dwelling facade and are designed to minimise their prominence. • Ensure basements project no more than 0.5m above natural ground level, unless the finished floor level of abutting properties is greater than 0.5m. • Where possible, locate the entry to basement garages to the side or rear of dwellings so they are not visible from the street.</td>
<td>• Driveways and car parking structures that dominate front setbacks or obscure views of the dwelling. • Adjoining garage doors facing the street in side-by-side townhouses. • Basement ramps that commence at the street frontage. • Basement garages that result in buildings with a 2.5 to 3 storey appearance from the street. • Driveways, basements and ramps that cover the extent of the site.</td>
<td><img src="image" alt="Location of car parking structures" /> <img src="image" alt="Avoid adjoining garages" /></td>
</tr>

General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City’s residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area’s landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct’s preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area’s preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.

REVIZIONS TO NEIGHBOURHOOD CHARACTER PRECINCT STATEMENT 55

- 23 May 2016- Update precinct boundary to include 602 to 608 Riversdale Road, Camberwell (Amendment C222 Part 3).
This brochure provides guidelines for the design of new dwellings and dwelling extensions to ensure that proposals assist in achieving the preferred neighbourhood character for the precinct. The guidelines will be used to assess planning applications. They will also be used to assess applications for a report and consent to vary the Building Regulations.

**Glossary**

**CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS**

- **Building Height and Form** — refers to building height (as measured from natural ground level), roof form and the massing of building elements.
- **Building Materials and Design Details** — refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.
- **Car Parking Structures** — refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.
- **Front Boundary Treatment** — refers to the presence, height and style of front fences.
- **Lot Frontage** — refers to the width of lots.
- **Siting** — refers to front setbacks, side setbacks and the area’s rear garden character.
- **Vegetation** — refers to the trees and landscaping on the site.

**GENERAL TERMS**

- **‘Box’-like** — refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.
- **Historic Buildings** — refers to early buildings that date from the establishment of the area or that are important to the area’s history.
- **Heritage Buildings** — refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.
- **Period Reproduction Design** — refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.
- **Front Setback** — The distance between the front property boundary and the dwelling, categorised as:
  - Small: 0 to 5 metres
  - Medium: 5 to 9 metres
  - Large: 9+ metres
- **Front Fence Height**
  - Low: 0.5 to 1.2m high
  - Medium: 1.2m - 1.5m high
  - High: over 1.5m high
- **Roof Forms**:
  - Flat — refers to a roof with a gradient of 10 degrees or less.
  - Pitched — refers to a roof with two slopes that meet at a central ridge.
- **Multi-Unit Dwellings**:
  - Flats / Apartment Buildings — refers to several dwellings contained in a multi-storey structure.
  - Town Houses — refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
  - Villas — refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.

**FURTHER INFORMATION**
