Precinct Statement
Adopted 24 September 2012, updated October 2013

DESCRIPTION
Precinct 63 encompasses a large portion of Glen Iris and part of Ashburton. This precinct stretches from Toorak Road to the north through to Gardiners Creek to the south. Linear parklands extend around and through the precinct, enhancing the area’s sense of spaciousness and greenery.

This precinct is dominated by single storey, interwar dwellings interspersed with newer 2 storey dwellings. Multi-unit villas are an increasing present in the precinct, most of which present as single dwellings to the street. There are also many estates throughout the precinct subject to single dwelling covenants. While terracotta roof tiles are commonly used, building materials vary between brick, rendered brick and cladding.

Front fences are mostly low to medium in height and front setbacks range from 5m to 9m. Dwellings are generally detached with side setbacks of 1m to 3m which allow for vehicle access along the side of lots. Lot frontages are relatively consistent, generally at around 15m to 20m in width.

Street widths are often narrow with street trees of varying ages.

Most dwellings in the precinct retain large rear gardens which contribute to the precinct’s spacious, open character.
Design Guidelines

KEY CHARACTERISTICS
- Predominantly interwar houses;
- Detached, 1 and 2 storey dwellings;
- Increasing presence of multi-unit villa developments;
- Pitched, tiled roofs;
- Moderate front setbacks;
- Consistent 15m to 20m wide lot widths;
- Landscaped front gardens;
- Low to medium high front fencing; and
- Large rear gardens.

PREFERRED CHARACTER STATEMENT
To enhance the consistency and character of streetscapes. To maintain the spacious, 1 and 2 storey suburban feel of the area and the garden setting of dwellings.

This will be achieved by:

- Encouraging the retention of large trees and landscaped gardens;
- Ensuring sufficient space is retained in front and rear gardens to accommodate large trees;
- Ensuring buildings are sufficiently setback from front and side boundaries to retain the existing streetscape rhythm;
- Ensuring new developments and additions respect the predominant building scale and forms of the streetscape;
- Ensuring car parking structures do not dominate the streetscape;
- Maximising soft landscaping and minimising areas of hard surfaces;
- Giving preferences to units set one behind the other as opposed to side by side, attached town houses; and
- Encouraging low or open style front boundary treatments.

THREATS/ISSUES
- Boundary to boundary development;
- Buildings that appear bulky and ‘box’ like;
- Two or three storey developments that dominate the streetscape;
- Lack of soft landscaping / vegetation;
- Car parking structures in front setbacks that obscure views of the dwelling behind;
- High front fences that disrupt the rhythm of the street;
- Removal / loss of large trees; and
- Period reproduction building design.
# Design Guidelines

## TABLE OF ELEMENTS

<table>
<thead>
<tr>
<th>CHARACTER ELEMENT</th>
<th>OBJECTIVE</th>
<th>DESIGN RESPONSE</th>
<th>AVOID</th>
<th>ILLUSTRATION</th>
</tr>
</thead>
</table>
| **VEGETATION**     | • To maintain and enhance the landscaped setting of dwellings. | • Ensure front gardens incorporate soft landscaping that complements the streetscape.  
• Ensure the retention of large trees. | • Removal of large trees.  
• Front gardens dominated by hard surfaces.  
• Loss of front gardens. | ![Encourage landscaped gardens](image) |
| **SITING**         | • To maintain and enhance the existing consistent streetscape rhythm and sense of spaciousness.  
• To maintain the existing spacious backyard character. | • Ensure buildings are setback no less than the average distance of the front setback of the adjoining properties on either side or 9m, whichever is less.  
• Ensure buildings are sufficiently setback from rear boundaries to maintain the open, backyard character of the immediate area where this exists.  
• Provide a secluded private open space area with a minimum of 4m to enable the planting and retention of large trees.  
• Ensure new development on a corner site is adequately set back to provide a transition between the adjoining buildings.  
• Ensure buildings are setback from both side boundaries and reflect the prevailing streetscape. | • Dwellings set too far forward.  
• Boundary to boundary development.  
• Dwellings built too close to their rear boundary with other residential properties. | ![Siting of units](image)  
![Front setbacks](image)  
![Side setbacks](image) |
| **BUILDING HEIGHT AND FORM** | • To maintain the existing one and two storey scale and pitched roof character of the precinct.  
• To ensure buildings do not dominate the streetscape or disrupt the existing streetscape rhythm. | • Ensure buildings are composed of facades that are no more than two storeys high to the street.  
• Ensure upper level additions to historic dwellings are sufficiently setback to appear as a recessive element.  
• Ensure attached side by side development is designed to read as one dwelling within the streetscape. | • Three storey facades to the street.  
• Large bulky buildings or extensions that dominate the streetscape.  
• Symmetrical presentation of side by side town houses. | ![Maintain 1 & 2 storey streetscape scale](image)  
![Avoid symmetrical design](image)  
![Avoid 3 storey facades](image) |

<tbody>
<tr>
<td><strong>Car</strong></td>
<td>To minimise the loss of front gardens and the dominance of car parking structures.</td>
<td>Ensure car parking structures, including entrances to basements, are setback at least 1m behind the dwelling facade and are designed to minimise their prominence.</td>
<td>Driveways and car parking structures that dominate front setbacks or obscure views of the dwelling.</td>
<td><img src="image" alt="Location of car parking structures" /></td>
</tr>
<tr>
<td><strong>Parking</strong></td>
<td>To ensure basement garages do not increase the visual bulk of buildings.</td>
<td>Ensure basements project no more than 0.5m above natural ground level, unless the finished floor level of abutting properties is greater than 0.5m.</td>
<td>Adjoining garage doors facing the street in side-by-side townhouses.</td>
<td><img src="image" alt="Avoid adjoining garages" /></td>
</tr>
<tr>
<td><strong>Structures</strong></td>
<td></td>
<td>Where possible, locate the entry to basement garages to the side or rear of dwellings so they are not visible from the street.</td>
<td>Basement ramps that commence at the street frontage.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Basement garages that result in buildings with a 2.5 to 3 storey appearance from the street.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Driveways, basements and ramps that cover the extent of the site.</td>
<td></td>
</tr>
</tbody>
</table>
General Information

ABOUT THE NEIGHBOURHOOD CHARACTER STUDY

This Precinct Statement was completed in 2012. The methodology involved a review of the Residential Urban Character Study from 1996 as well as substantial community consultation and fieldwork. As a result of this review the City’s residential areas have been divided into 75 precincts.

The common characteristics of each area in terms of building scale, setbacks, building style and form and the area’s landscape character were taken into account when determining the boundaries of each precinct.

The resulting Neighbourhood Precinct Character Statements describe the existing character of each precinct as well as the precinct’s preferred future character.

Those characteristics most valued by the community were reflected in the preferred character statements. The accompanying design guidelines table provides direction for new buildings which ensure future development assists in achieving the area’s preferred character.

The Boroondara Neighbourhood Character Study is based on an analysis of existing neighbourhood character and does not take into account other planning policy objectives such as housing capacity, access to services and sustainability.

HOW THE PRECINCT STATEMENTS WILL BE USED

The Precinct Statements will be used when assessing planning permit applications in residential zones. In instances where no planning permit is required (e.g. for single dwellings on lots over 500m²), the Precinct Statements will be used when assessing report and consent applications to vary the siting requirements of the Building Regulations.

New development proposals will be assessed against the directions contained in the “objective”, “design response” and “avoid” columns in the design guidelines Table of Elements. Proposals will need to demonstrate how they meet the objectives in the table if they do not meet the relevant “design response” or “avoid” criteria.

With the exception of the guidelines relating to rear garden character, the view from the street will be used to assess consistency with the design guidelines. Existing development that does not comply with the design guidelines should not be used as a precedent when designing new buildings or building extensions.

RELATIONSHIP TO OTHER POLICIES AND GUIDELINES

The Precinct Statements will be used in conjunction with other policies and guidelines in the Boroondara Planning Scheme.

Where a conflict occurs between the Precinct Statements and an existing Design and Development Overlay or Council’s Heritage Policy, the provisions of the Design and Development Overlay or Council’s Heritage Policy will take precedence.
Glossary

CHARACTER ELEMENTS IN DESIGN GUIDELINES TABLE OF ELEMENTS

- **Building Height and Form** – refers to building height (as measured from natural ground level), roof form and the massing of building elements.

- **Building Materials and Design Details** – refers to external building materials, façade articulation and design elements such as verandahs, awnings, window configurations and eaves.

- **Car Parking Structures** – refers to the presence and location of on-site car parking structures such as garages, carports, driveways and uncovered car spaces.

- **Front Boundary Treatment** – refers to the presence, height and style of front fences.

- **Lot Frontage** – refers to the width of lots.

- **Siting** – refers to front setbacks, side setbacks and the area’s rear garden character.

- **Vegetation** – refers to the trees and landscaping on the site.

GENERAL TERMS

- **‘Box’-like** – refers to a building with proportions and detailing that give the building a box-like appearance. Typical characteristics include sheer two storey walls, no or narrow eaves, a symmetrical, un-articulated front facade and a low pitched or flat roof form with parapet detailing.

- **Historic Buildings** – refers to early buildings that date from the establishment of the area or that are important to the area’s history.

- **Heritage Buildings** – refers to historic buildings that are subject to statutory protection through a Heritage Overlay or the Victorian Heritage Register.

- **Period Reproduction Design** – refers to design that incorporates mock heritage detailing such as Mock-Georgian and Mock-French Provincial elements.

- **Front Setback** – The distance between the front property boundary and the dwelling, categorised as:
  - **Small**: 0 to 5 metres
  - **Medium**: 5 to 9 metres
  - **Large**: 9+ metres

- **Front Fence Height**
  - **Low**: 0.5 to 1.2m high
  - **Medium**: 1.2m - 1.5m high
  - **High**: over 1.5m high

- **Roof Forms**
  - **Flat** – refers to a roof with a gradient of 10 degrees or less.
  - **Pitched** – refers to a roof with two slopes that meet at a central ridge.

- **Multi-Unit Dwellings**:
  - **Flats / Apartment Buildings** – refers to several dwellings contained in a multi-storey structure.
  - **Town Houses** – refers to dwellings of 2 or more storeys that have their own entrance and private yard, but which adjoin another dwelling.
  - **Villas** – refers to groups of dwellings which have their own entrance and private yard, which may or may not adjoin another dwelling, but which generally share common areas such as driveways and car parking.
